

# Managed Services

Widen your net and extend your reach

## GET MORE DONE IN THE DAY

Whether you're looking to wring more value out of existing technology or offload IT management to someone you trust, Managed Services can be the catalyst you need to take your business goals into the finish line. When you work with Compugen, our teams wear the same jersey. So what do you say... meet you on the field?

## OFFLOAD ROUTINE TASKS

"Digital business transformation is entering a more challenging, urgency-driven phase. Business leaders feel the ever-expanding pressure to provide customers with digital solutions. As part of this transformation, enterprises have many drivers for utilizing an [MSP](#)!-[GARTNER](#)

## HEIGHTEN YOUR SECURITY

Cisco states that 46% of network devices are likely to be machine-to-machine or IoT, by 2020, which are vulnerable to attacks. With hacking and new vulnerabilities popping up daily, let the Compugen Managed Services keep another set of eyes on your network.

SERVICE IS OUR CRAFT

## The Benefits of **Managed Services**

Whether it's remote server monitoring and maintenance, data security, or even device management, Compugen has you covered from end to end. Escalate high priority issues, offload ad-hoc tasks, or allocate additional resources to specific projects and functions. We're nimble enough to work around your needs, and seasoned enough to support them - whatever they happen to be.

With every idea, with every interaction, we are committed to transforming customer service into a uniquely crafted human experience.

### Scalability

When you work with

### Scalability

Expanding IT resources as your business grows is much simpler when you have a trusted team to turn to that knows your business, knows your network, and knows how to get it done.

### Cost Control

Reduce operational expenses or conserve capital budget by managing your IT environment on a subscription-based model that's designed around your business' peaks and valleys.

### Assurance

When you work with Compugen, you've got people looking out for you, keeping your business ahead of the turn and tracking problems through to a successful resolution.

INNOVATE. INSPIRE. IMPACT.

## WHY COMPUGEN

Every day, we work to cultivate technology-based solutions that transform traditional customer service into unique human experiences.

By intentionally developing technology solutions as-a-service, we are committed to our vision to make a positive, rippling impact on the world around us.

LET'S TURN IT MANAGEMENT INTO BUSINESS MODERNIZATION

## IT Managed Service Offerings

### Near Shore Help (Service) Desk

The quality of technical support your business provides can all but make or break your employee experience. not to mention your

### Managed Office 365

Maximize the full investment of your Office 365 environment by passing on the management and support responsibilities to us. We'll handle the daily maintenance,

### Managed Mobility

Your employees and customers are mobile-first. Is your company? Our enterprise mobility management service keeps business moving 24x7x365. No surprises, no

make or break your employee experience, not to mention your customer relationships. Compugen's help desk puts the human touch in IT, offering personalized service and knowledgeable guidance when your users need it.

support responsibilities to us. We'll handle the daily maintenance, updates, and patches so your users never have to think twice about glitches, downtime, or data loss.

service keeps business moving 24x7x365. No surprises, no setbacks. Just a steady stream of data, people, and ideas in motion.

### **Managed Collaboration**

Advanced collaboration solutions for voice, video, messaging, and contact center offer an endless configuration of options and use cases. In its ideal end-state, enterprise productivity soars and communication costs go down. But in real life, the collaboration space is fragmented with providers and products. Integration, security, and compliance are like cats waiting to be herded. That's why a Compugen-managed collaboration solution takes the headache off your hands letting you focus on more pressing priorities.

### **Managed Detect and Respond**

With the volume and variety of business-crippling threats that organizations must prepare for, it's no surprise that many have more security resource gaps than they can fill. Go beyond prevention and layer your security stack with the people, policy, and process that only Compugen MDR can bring.

### **Backup-as-a-Service**

In the last two years alone, 90% of the world's data has been created. So, for organizations who are data-dependent, cloud-based BaaS is a highly efficient alternative to traditional, on-site backup boasting multiple levels of redundancy and fast data recovery, all managed on your behalf.

### **SOC-as-a-Service**

Compugen will manage and monitor all of your devices, logs, and assets giving you a higher level of security that stand-alone products simply cannot match. SOC-as-a-Service is like having your own threat intelligence army, vigilantly watching over your network for patterns and changes to the threat landscape.

### **Device-as-a-Service**

Simplify and streamline the entire lifecycle of your digital workspace with Compugen's remote device management service. Order fulfillment, upgrades, cancellations, recovery—we've got it handled.

changes to the threat landscape.
