The Equalizer is a very portable 150' long tool. It easily allows any crew member to precisely lay out fence sections equally spaced down to a 1/2 inch tolerance. It eliminates the need for a tape measure or complicated math. The EQUALIZER is simple to use. Just start at the one end post and stretch the cord to the other end post. The tabs on the cord will give you the precise locations for the posts in between. The EQUALIZER is a must have for any fence company that installs wood fence but also works with fence installs of any kind. The cord is engineered not to go over specified centers. **Available in 6', 8' and 10' centers. Comes with Offset cable and Gate Spacer.**

The Equilizer

Keith P. on Feb 15, 2022

This is a game changer probably paid for itself in a few jobs. Originally thought it was overpriced but couldn't be further from the truth. One of the best new tools we've bought and over a decade. You won't be second guessing this purchase, he won't take you long to buy another one or two. We have two and need two more.
