SECURELY HOST AND DEPLOY MISSION APPLICATIONS

A fast-tracked, secure alternative to an otherwise manual, time-consuming process. Game Warden provides a solution for both commercial and government entities looking for an edge in driving software adoption in the defense industry.

- Fully managed and compliant DevSecOps platform
- Hosted IL4/IL5 production environments
- Rapid accreditation through Game Warden ATOs
- 24/7 Alerting and Monitoring

BUILT FOR YOUR USE CASE BY INDUSTRY EXPERTS

COMMERCIAL

Configure, secure, and deploy your software to Department of Defense customers with a fully managed and compliant production environment.

- ✓ Fully managed DevSecOps environment
- ⚡ Rapid accreditation
- 🚫 Eliminate reliance on 3rd party consultants
- 📁 Access government markets through hosted production environment

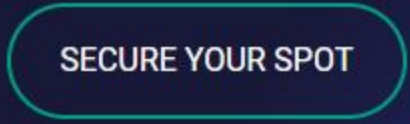

[SECURE YOUR SPOT](#)

GOVERNMENT

Expand the bridge between commercial software and national security and quickly deploy applications for your mission requirements.

- ⚡ Accelerate mission apps and onboard commercial tech
- 📄 Build and maintain accredited 'sandbox' testing and evaluation environments
- 🔗 Leverage cross-domain solutions for commercial applications
- 🚚 Rapidly scalable Day 2 Operations

“Game Warden streamlines the process any new startup faces when working with the government and deploying to production in an accredited environment.”

Kartik Chopra
CEO of Devron

HOW IT WORKS

You and your team will receive a dedicated instance of Game Warden, which will be used to rapidly onboard, host and deploy applications. Explore your app's journey below.

ONBOARD YOUR TEAM

Create an account and share key details about your technology to begin building and securing your application and configuring your Game Warden environment. From the moment you log into the platform, you'll have access to our cybersecurity team to walk you through the process.

YOUR ALL-IN-ONE HOSTING AND ACCREDITATION SOLUTION IS HERE

COMPLIANCE BAKED IN

Build your application on an accredited pipeline to reduce headaches, free resources, and maintain compliance.

DEDICATED CUSTOMER SUPPORT

Don't worry. Experts in DevSecOps and defense are available from day one to help guide you through the process.

AVAILABLE IN IL4/IL5

Deploy to DoD cloud computing Impact Levels 4 and 5 environments. Higher classifications are on the roadmap.

24/7 ALERTING AND MONITORING

Maximum health and uptime status due to continuous monitoring and logging of the production environment.

INHERITED ATO

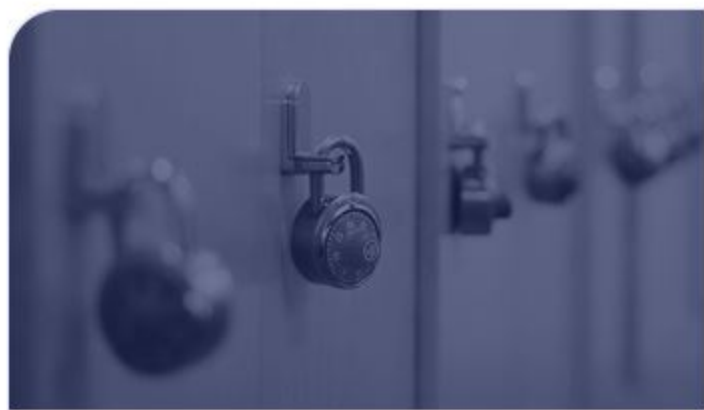

Operate in production on government networks through an inherited Authority to Operate (ATO).

COMMERCIAL CLOUD PROVIDERS

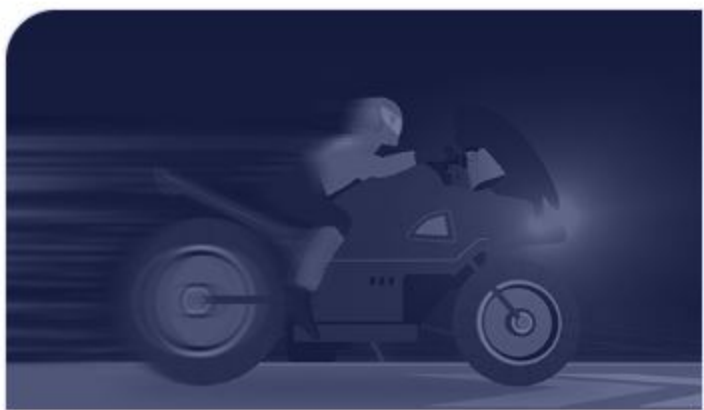

Available in AWS GovCloud with additional cloud providers coming soon.
