

Intelligent Healthcare IT Automation

Automate your IT testing, improve accuracy, and save tens of thousands of hours.

EHR and related system testing is a tangled, messy burden that soaks time, drains resources, and hurts morale – a cost no health system can afford.

There's just never been a reliable way to simplify testing, until now.

Welcome to the era of intelligent test automation.

SureTest's expert methodology, combined with our unrivaled library of test scripts, will emulate your end-user experiences and validates workflow integrity so quickly it will revolutionize your entire approach to system upgrades and new implementations.

Automate your entire EHR and related system testing process and redeem thousands of hours every year

Optimize Staff

More Testing, Better Quality, Less Stress.

- ⚡ SureTest eliminates >80% of manual testing activities
- ⚡ No more playing referee with departments to secure resources for testing
- ⚡ Keep clinicians focused on delivering care
- ⚡ Free up staff time to focus on more strategic initiatives
- ⚡ Mitigates staff burnout and improves employee morale and satisfaction

Realize Optimal Efficiency

Eliminate Tens of Thousands of Manual Testing Hours

- ⚡ SureTest works in the background to dramatically reduce the length of testing cycles
- ⚡ Speeds path to go-live, upgrades and ongoing optimization
- ⚡ Keeps projects on schedule
- ⚡ Continuously manages and monitors automated testing
- ⚡ Provides real-time audit documentation

Improve Patient Care

Continuous Testing Saves Lives

- ⚡ SureTest accounts for every patient journey and related workflow
- ⚡ Automated (daily) testing of routine fixes and enhancements
- ⚡ Eliminates clunky workarounds that invite risk
- ⚡ Eliminates the risk of insufficient testing – often caused by competing priorities
- ⚡ Keeps rigorous testing a priority

FEATURES

SureWorks LIBRARY

The world's most **extensive collection of automated test scripts** is the linchpin of our test automation solution. Our library is the key to automation value, and **jump starts the speed of customized development**. What takes a health system three years to develop internally, can be **executed in a few months**.

It's constantly updated and customized to each workflow within your organization's departments to provide **end-to-end integrated and regression testing**.

SurePersona ENGINE

This powerful tool knows and emulates the exact functions each team member needs to employ for each use case and performs them with **astounding speed and precision** every time.

Free your team from the time-sucking tedium of testing, allowing them to focus on improving care for your community.

SureMethod FRAMEWORK

This methodology is the bedrock for each test automation sequence we deploy.

It's a **rigorous framework** carefully developed by a team of seasoned healthcare experts certified in all major EHRs and test automation tools.

Our commitment to SureMethod means you **realize continuous testing, robust script maintenance and real time reporting**.

Freedom!

SureTest lets you free your clinicians and analysts to focus on improving lives.

Remove your EHR and related system testing burden with all its pain and expense, and instantly improve the speed and integrity of your processes.

Experience the confidence of having the world's finest testing specialists and technology on your team and ready to go – now!

OUR SOLUTIONS

Your Turnkey Solution for Healthcare IT Automation

Your health system is a complex structure, like a large tree, and your patients move through it like the tree's nutrients.

It can provide life and health, but only when all parts are working together. EHR and other third-party application testing helps ensure this, which is why you have an imperative to get it done right.

SureTest has the answer.

Currently, hospitals run labor-intensive, redundant tests from the roots to the tips for each branch, representing each potential patient journey in the system.

If you add a new branch, you must create a new test from the ground up. But many components of your tree are shared.

SureTest understands the vital workflow components of your organization, and we configure your SurePersona™ Engine to your unique structure.

- ◆ You can target your tests to areas that need testing and automate them with much less overhead.
- ◆ We then simply add the appropriate test modules to your customized structure.

SureWorks

LIBRARY

SureWorks is our extensive collection of automated test scripts and is the linchpin of our test automation solution.

Our library is the key to automation value and jumpstarts the speed of customized development. What takes a health system three years to develop internally, can be executed in a few months.

This proprietary resource is constantly updated and customized to each workflow within your organization's departments to provide end-to-end integrated and regression testing.

The scripts are automatically deployed and scheduled at scale to drive automatic, system-wide testing.

SurePersona

ENGINE

This powerful tool knows and emulates the exact functions each team member needs to employ for each use case and consistently performs them with astounding speed and precision every time.

SurePersona frees your team from the time-sucking tedium of testing, allowing them to focus on improving care for your community.

SureMethod

FRAMEWORK

This methodology is the bedrock for each test automation sequence we deploy.

It's a rigorous framework carefully developed by a team of seasoned healthcare specialists certified in all major EHRs and test automation tools.

We've been down the implementation road more times than we can count, and we've seen how testing can make or break a project. Our commitment to SureMethod means you realize continuous testing, robust script maintenance, and real-time reporting.

Unleash the Power of Eggplant

Eggplant is an extraordinary tool, but it's often terrifically underutilized.

With SureTest, you'll not only use the platform, but you'll supercharge it and realize extraordinary value from your investment.

We are a leading, certified Eggplant partner, working hand in hand with their team to push the boundaries of what is possible and achieve ultimate platform efficiency.

Since we know exactly how the software should work, we orchestrate a true end-to-end solution that makes Eggplant instrumental to your system implementations and upgrades.

If you're not already on Eggplant – No Problem. We'll lead you through onboarding and tailor your specific SureTest solution.

How SureTest Makes Phenomenal ROI Your Reality

By SureTest | November 29, 2021 | Blog

There is a common misperception around cutting-edge technology. People often expect to pay more for the "latest and greatest."

If it's faster, better, and makes your life easier, it will cost more. Right?

Wrong.

At SureTest, we help our clients realize phenomenal ROI by making your testing process work smarter.

We're passionate about helping clients liberate their teams from the heavy burden of manual testing. It's time to say goodbye to the status quo.

You *can* have your technology and real ROI, too.

Compelling ROI

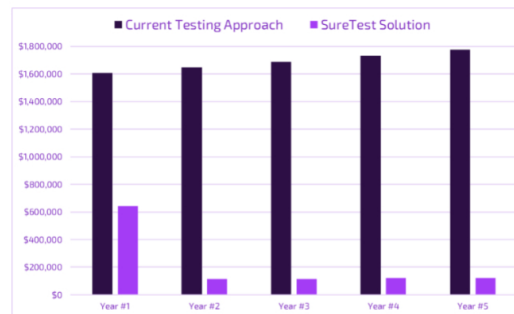

Recent client studies confirm that SureTest delivers a positive ROI in Year 1 with a 5-year ROI of 200% to 500%+ depending on the size of the health system and how you are currently testing.

We interviewed eight of our clients to see how much time their analysts spend testing their daily break/fix, planned optimization and related work. It ranged from an hour and a half to three hours a day.

We also validated the time to keep testing scripts for planned events documented, updated, retrofitted manually, plus the dedicated (typical) two weeks allocated during an upgrade cycle, and on average that totaled six weeks per testing cycle.

To demonstrate the time/cost savings of our solution, we'll use the SureTest ROI Calculator that factors in variables such as the number of test cycles per year, any additional special test cycles, number of employees working on test scripts, average salary, and how much time they're spending per test cycle. We even factor in benefits such as PTO.

In this example, we plugged in the client's actual information. In Year 1, the client would spend \$1.6 M on the various EHR testing related activities. The total amount spent Year 1 through Year 5 would be over \$8.4 M.

The estimated 5-Year savings using SureTest vs. a manual approach is more than \$7.3M. For this particular client example, it means an estimated 3-Year Simple ROI of 467% and a 5-Year Simple ROI of 660% – a wildly compelling case for automation.

How It's Possible

At SureTest, we eliminate up to 80% of manual testing activities.

Our SureWorks™ Library contains over 2,000 automated EHR and integrated test scripts that jumpstarts the speed to develop a clients SurePersona™ Engine that contains your specific workflows. We provide extraordinary speed to value by combining it with SureMethod, our rigorous plug-and-play framework which allows us to do continuous smoke and regression testing, while maintaining test automated test scripts in real-time.

Realize Immediate ROI

At SureTest, we've priced our solution so you can capture immediate ROI through efficiency.

risk mitigation, reallocation freedom, and rapid deployment.

We leverage our SureMethod approach to capture and confirm your workflow and associated testing requirements. This is an extraordinarily light time commitment and is typically completed within the first week of the project. Other than a small-time requirement to validate our automation development to your workflow, there is essentially no other time required from the client. With our full-service solution, inclusive of maintenance, rather than testing one or two times before an upgrade, your workflows, break/fix, and ongoing optimizations will be continuously tested. This game-changing efficiency allows you to realize greater testing integrity and drastically reduces the risk caused by insufficient testing.

You'll gain additional efficiency with a timesaving step-by-step, electronic workflow for training, clinical validation, and audit purposes.

Gone are the days of having to steal time from analysts, clinicians, and end-users for weeks on end to deal with an upgrade and day-to-day testing requirements. With SureTest, you can free your team to focus on their primary job responsibilities. You'll recapture ROI as you reallocate staff to more strategic initiatives.

Not only that, but SureTest gives you phenomenal speed to value. We rapidly deploy automation within the first few weeks. This timeframe allows you to more quickly reallocate full-time employees who no longer need to be burdened with testing initiatives.

We deliver leverageable automation in the first 4 – 6 weeks with the full scope of automation delivered in 6 – 9 months.

SureTest's ROI Calculator

SureTest's ROI Calculator lets you plug in your specific data and receive a custom ROI analysis to support and justify the minimal cost of our full-service automation program.
