

# PAVILION®

## UMBRELLAS

Our commercial-grade umbrellas offer durable shade protection for your favorite outdoor spaces. Featuring marine-grade stainless steel hardware, powder-coated aluminum structure and marine grade canopies, our umbrellas are built for years of use in tough conditions. Select center post for tables or between chairs or choose cantilevered for accessibility and an uninterrupted view in dining areas, for deep lounge seating or poolside over chaise lounges. Our market style, vented canopies are available in several shapes and sizes and an array of colors. Aluminum pole is 1" diameter with standard push-up and pin operation. Coordinating bases sold separately.
