NOTE: For extremely dry climates (when humidity is less than 15%) and/or when the surface is fine dust powder more than 1" deep, please choose [Ground Glue Soil Stabilizer](#) instead.

SUPER-CONCENTRATED, LONG-LASTING DUST SUPPRESSANT

Ground Glue™ Dust & Gravel is a long-lasting dust control and stabilization (i.e. increasing the weight bearing capabilities, reducing erosion, etc.) product for rock and gravel paths, drives and roads. The most economical product in the Ground Glue lineup, Ground Glue Dust & Gravel is a high-grade, hydroscopic compound that attracts moisture from the air and then absorbs it into the road surface. Once in the road, Ground Glue Dust & Gravel resists evaporation, encumbers dust, binds dirt together and stabilizes gravel – all while reducing maintenance and watering costs.

Ground Glue Dust & Gravel "glues" fine dust and aggregates to keep surfaces stable and dust-free. Effective on most soil and gravel types.

Features

- Immediate impact: Begins controlling dust now
- Surface treatment – no mixing with soil or compaction required
- Concentrated – dilutes with water up 10X
- Contains no asphalt or hydrocarbons, environmentally preferred
- Economical and long-lasting effectiveness increases over time
- Ideal for gravel road maintenance – fixes fines into the base to form a foundation for the gravel
- Contains anti-scale and corrosion inhibitor additives
- Will not harm application equipment
- Self-cleaning formula – just rinse to leave application equipment clean

| Coverage for Dust Suppression | 5 gallon jug | 55 gallon drum | 265 gallon tote |
|-------------------------------|----------------|-----------------|-------------------|
| Short Term (1-2 weeks) | 60,000 sq. ft. | 660,000 sq. ft. | 3,180,000 sq. ft. |
| 3 months (seasonal) | 30,000 sq. ft. | 330,000 sq. ft. | 1,590,000 sq. ft. |
| 6 months (biannual) | 15,000 sq. ft. | 165,000 sq. ft. | 795,000 sq. ft. |
| 1 year | 7,500 sq. ft. | 82,500 sq. ft. | 397,500 sq. ft. |

Dust Suppression Application Calculator

To determine how much Ground Glue Dust & Gravel you'll need for your dust suppression application, simply measure the length and width of the area you are going to treat (in feet), and then enter the length of time (in weeks) that you want the application to last. For example, if you want the application to last for a season, key in 13. If you want it to last for the maximum of one whole year, enter 52.

NOTE: For extremely dry climates (when humidity is less than 15%) and/or when the surface is fine dust powder more than 1" deep, please choose [Ground Glue Soil Stabilizer](#) instead.

Length of area to be treated in feet:

Width of area to be treated in feet:

Desired duration in weeks (up to 52):

Number of gallons required: 0

Gravel Surface Application Calculator

To determine how much Ground Glue Dust & Gravel you'll need for your gravel road, parking lot, etc., simply measure the length and width of the area you are going to treat (in feet), then measure the average depth of the gravel bed (in inches), and then enter the length of time (in weeks) that you want the application to last. For example, if you want the application to last for a season, key in 13. If you want it to last for the maximum of one whole year, enter 52. **NOTE: Because of the wide variance in surface area, some gravel types may require more or less product than calculated. Please review the Application Sheet for details.**

Length of area to be treated in feet:

Width of area to be treated in feet:

Depth of gravel bed to be treated in inches:

Desired duration in weeks (up to 52):

Number of gallons required: 0
