

STEM To Stern

A partner of [USRowing](#) that helps rowing teams become more diverse and competitive.

By eliminating barriers that many communities face, rowing teams can draw from a larger pool of athletes and create a diverse and inclusive environment at their clubs.

STEM to Stern helps make this possible.

Relationships

The STEM to Stern program uses rowing to bring people together across racial and socioeconomic boundaries. By creating diverse rowing teams, we foster relationships that change lives and improve society. In a country as divided as it is, STEM to Stern is a program that shows what is possible when we come together.

Access

It is important for clubs to see themselves as part of the communities they represent. This includes everyone, regardless of race, socioeconomic status or zip-code. STEM to Stern removes the main barriers that currently keep many people from accessing rowing teams. By addressing transportation, swimming and academics, we ensure that everyone has the opportunity to participate and succeed on and off the water.

Competition

Clubs that grow in size and diversity increase their level of speed and relevance in their community. With additional athletes competing for spots in boats, your team will have more rowers pushing each other and bringing the best out of each other. STEM to Stern facilitates this environment of competition by adding new athletes to your crew.
