Installation

PACKAGE CONTENTS:
 A - 1/4" OD x 25' Copper Tube
 B - Saddle Valve (1)
 C - Compression Fittings (4)

 Safety goggles
 Phillips Screwdriver

1 PREPARING FOR INSTALLATION
 - Pick a cold water supply pipe located as close as possible to the appliance. Clean the main water shut-off valve. Clean & flush the line near the installation to remove pressure in the line.

2 CONNECT TO THE WATER INLET
 - Connect one end of the copper tube (A) to water inlet for pipe on the back of the refrigerator.
