ENTEGRAL SUITE

Let's transform how we get drivers moving after a claim.

Entegral invites you to join the movement toward faster, smoother, more efficient automotive claims.

We're bringing together insurers, auto manufacturers and collision repair centers with a powerful platform that makes it all possible

It starts with proactive program management.

Network Management acts as the foundation of the Entegral suite of products. We start by building your network and team hierarchy within the application — providing you with a comprehensive solution to run an efficient, data-driven repair program. Network Management streamlines program management, with an intuitive approach to training, testing, auditing, growing and optimizing your network.

Entegral makes it easy — all from one web-based application:

✓ Replace manual and paper processes with digital workflows for a more efficient field team

✓ Organize and track expirations and shop details with automated reporting

✓ Improve timeliness and accuracy of shop qualifications with the industry's largest source of validated third-party data

✓ Access a robust set of non-network shops to identify opportunities — over 20,000 shops on the platform

✓ Fully integrate using available APIs

✓ Entegral's dedicated account team provides full network onboarding and team training for a smooth transition

LEARN ABOUT NETWORK MANAGEMENT

NETWORK MANAGEMENT

SMART LOCATOR

Increasing auto claim satisfaction.

Building on Network Management, Entegral's Smart Locator gives your team the tools to improve the claims experience. Loss vehicle data combines with network details and customer preferences to provide real-time, intelligent recommendations for a qualified repair.

Entegral's open platform makes you more efficient at every step, from the initial report of the incident through completed repairs.

✓ Alleviate the guesswork in shop recommendations by pairing customer information with shop attributes

✓ Create rules to automate shop recommendations

✓ Display both in- and out-of-network shops, regardless of network coverage

✓ Ensure data flows into claims systems and self-service apps with advanced APIs

LEARN ABOUT SMART LOCATOR

Working the way you work.

We understand that every partner is different. That's why we've built Entegral as a configurable, open platform to support your unique program. We believe this flexibility and the channels of communication it brings are the key to improving and optimizing the claims experience for everyone — insurers, body shops, OEMs and drivers alike.
