About this app

Draw the Perimeter with Curves or Straight Lines. Nanometers to Miles. Imperial or Metric.

SketchAndCalc™ is the only area calculator capable of calculating areas of uploaded images. The area calculator has a unique feature that allows you to set the drawing scale of any image before drawing the perimeter of the shape. Irregular area's containing angles or curves are therefore easily calculated without complex geometry math.

Not for Android, can't draw easily. Supposed to be able to draw and calc an area, the drawing is the problem on a mobile, cant adjust a line length? Great you can bring in a map but can't easily draw the borders or I couldn't figure it out (I'm an Engineer). Spent way too much time and then uninstalled the thing.

iCalc June 9, 2020. Hi Gary. We appreciate drawing accurately on a phone screen can be difficult. Aside from the ability to Pan/Zoom and Numerically Set a Lines Length, seen here: https://bit.ly/2zgFXch the Mobile Companion App supports Accurate Drawing using a Puck or Stylus. If you still find drawing frustrating, consider using a mouse at: www.SketchAndCalc.com.

Seems like it would do what I need. But trial ended for the android phone app after a few hours and I am caught in a loop when I log in it sends me to the web page to purchase but when I select a plan it sends me to the Playstore to download the app which is already installed. When I select Open it asks me to login again then sends me to the web page. Not the most user friendly.

I used the web interface on my home computer to calculate an area, and while there was a bit of a learning curve that took longer than I expected, it was pretty great in the end. But now I am trying to use the Android app version on my phone, and is like to log into my account to see my saved files (yes, I saved them to my account). But the app just keeps saying "please reactivate your account." There is nothing else to click on except "forgot password" (I did not forget my password).

Hi Julie, I looked into this for you. It appears you are currently trialing and therefore will not be able to access server-side functions like accessing saved files. More on this here: <https://www.sketchandcalc.com/area-calculator/help#can-i-print-and-export-whilest-trialing>. If you need further support you can reach me at Elliott@SketchAndCalc.com
