UPACO EcoBond

ECOBOND FILMS: SUPERIOR SOLE- ATTACHING TECHNOLOGY

These patented films have been developed to bond to various soling and midsole materials for permanent sole-attaching.

Depending on the substrates to be bonded, the films may be used in-mold or post mold. Standard films are available for bonding PU, EVA, and some rubber materials. Because of the wide variety of rubber compounds used, our technical sales crew will work with the customer and/or compounder to develop film

STITCHLESS FILMS: FILM TECHNOLOGY IN A CLASS OF ITS OWN

These films may be used to eliminate stitching required on uppers for design purposes. The single-layer films may be used to permanently combine mesh, synthetics, PVC, TPU, and other materials. By choosing the appropriate multi-layer extrusion, one side will seal to the surface of the upper while the other may be p
