1000S PASSENGER IMMERSION SUIT

Product Overview

4-hour certified immersion suit for helicopter passengers travelling to and from helidecks located in hostile sea areas. The suit's outer shell is waterproof, breathable and inherently flame retardant, while the thermal lining uses phase change materials to combat thermal stress and increase wearer comfort.

BENEFITS

- Internal liner integrates NASA-developed technology to facilitate thermal regulation for increased comfort and in-water survivability
- Neoprene neck and wrist seals ease donning, avoid damage and eliminate leaks
- GORE-TEX Nomex outer shell combines breathability with fire protection
- Waterproof zip configuration saves weight and aids comfort
- Air release valves enable rapid escape and safety in the water
- Industry's biggest size range to provide an 'off the shelf' custom fit for greater safety and comfort
- Unisex design improves comfort for all heights between 150 cm and 220 cm
- Abandonment only version available with metal zips and in sealed foil bag for 5-year service life
