### About

The Global Environment & Technology Foundation (GETF), established in 1988, is a leading 501(c)(3) nonprofit organization with a mission to accelerate sustainable development through partnerships that deliver impact at scale. GETF builds and manages high impact public-private partnerships improving the lives of over 10 million people in 65 countries through water access, sanitation and hygiene, health systems strengthening, entrepreneurship, women's empowerment, sustainable agriculture and climate resilience. Partnership platforms under GETF's management include the Replenish Africa Initiative (RAIN), The Coca-Cola Foundation's signature community water initiative, the Water and Development Alliance (WADA) and Project Last Mile Partnership (PLM) both partnerships between The Coca-Cola Company and USAID. GETF serves as the Secretariat for two high-impact water coalitions – Global Water Challenge and the US Water Partnership. For more information visit <http://www.getf.org>.
