Designed for your team

Fable Upskill provides video-based courses designed by accessibility experts specifically for your team. The custom courses directly incorporate your products and designs, enabling your team to apply their new skills immediately. They also are custom to the tools that your team uses and the roles that you want to train.

Targeted training for specific roles

Everyone on your team plays a unique role in building inclusive products. Fable Upskill enables your team to develop key accessibility skills and serves as a companion in their day to day work.

With Fable Upskill:

- ✓ Designers learn how to annotate design deliverables using your own prototypes
- ✓ Developers understand how your navigation menu works for screen reader users
- ✓ QA analysts develop workflows of how and when to use accessibility testing tools

Intro to Digital Accessibility

Learn the basics. In this course, we'll cover how to talk about disability, different perspectives of disability and accessibility, as well as how assistive technology works with your products.

Accessible User Experience

Explore how fonts, colours, images, and focus indicators impact people with disabilities. Learn about processes to support accessibility, such as annotating designs and inclusive research.

Accessible Web Development

Understand how assistive technology interacts with the DOM, and how to build for it. Learn about building accessible forms, navigation menus, and notifications.

Accessible Mobile Apps

Testing Accessibility

Custom Curriculum

disabilities, dive deep into iOS or Android, and how to test for accessibility in your workflow.

assistive technology. Practice using browser plugins and learn when to leverage testing tools throughout QA.

with that.

Individual progress

Name	Team	Course	Enrolled	Progress
Michael Anglo	Engineering	Intro to Accessibility	November 15, 2021	27% complete 
Donna Tello	Engineering	Accessible Web Development	November 11, 2021	100% complete 
Leon Ardo	Design	Intro to Accessibility	October 25, 2021	100% complete 

Engineering Team

41 out of 164 members

Design Team

60% completion
29 out of 48 members

Research Team

100% completion
16 out of 16 members

Manage and track accessibility training

It's essential that accessibility knowledge is distributed. Fable Upskill allows you to see how your team is progressing in their skill development as individuals and as functions. With Fable Upskill:

- ✓ Ensure your team has a common understanding of accessibility
- ✓ Track accessibility skills for each team function
- ✓ Operationalize accessibility training

Learn directly from people with disabilities

People with disabilities are uniquely qualified to teach about accessibility through their lived experience. With Fable Upskill, your team can learn about how people with disabilities use assistive technology and how they experience your products. For example, your team might learn:

- ✓ Tips on alignment of content from low vision users
- ✓ How ARIA impacts a screen reader user's experience
- ✓ How a person with a motor disability navigates interfaces

Content based on your tools

Fable Upskill improves how your team uses your existing tools to build inclusive products. Get access to interactive exercises that:

- ✓ Prepare your researchers to engage people with disabilities
- ✓ Ensure that your designers know what to communicate with developers
- ✓ Help your developers evaluate their own work

Less guidelines, more practical how-tos

Most accessibility training focuses on understanding compliance guidelines. Fable Upskill trains your team in practical, real-world skills that they can apply directly. For example, give your team more
