Description

REMOVE Black Heel Marks, RESTORE Tile & Grout, REDUCE Cleaning Costs!

Remove Tough, Caked-On Dirt and Grime

Unitex® XTRACT melamine floor pads are designed to eliminate stubborn soiling—especially black heel marks—on shallow grout and other tough-to-clean floors that don't respond to standard floor pad cleaning. These pads reduce overall cleaning costs while delivering an outstanding level of clean!

No Harsh Chemicals Needed!

These specialty pads are made using the original BASF open-cell melamine foam, laminated to nonwoven material made of 100% recycled polyester fibers. But the secret to how Unitex® XTRACT pads remove caked-on grime lies in how the pad moves.

Unitex® XTRACT melamine floor pads are designed to eliminate stubborn soiling—especially black heel marks—on shallow grout and other tough-to-clean floors that don't respond to standard floor pad cleaning. These pads reduce overall cleaning costs while delivering an outstanding level of clean!

No Harsh Chemicals Needed!

These specialty pads are made using the original BASF open-cell melamine foam, laminated to nonwoven material made of 100% recycled polyester fibers. But the secret to how Unitex® XTRACT pads remove caked-on grime lies in how the pad moves.

The movement of the pad causes intense friction that scrubs away even the most deeply embedded dirt without removing finish or micro-abrading the floor. The key is to completely saturate the pad and keep it wet during use (a spray bottle just isn't enough!). This prevents drag and ensures only the dirt is removed.

There's no need for harsh chemical cleaners. Plain water and a low-pH or appropriate green cleaner are all you need to achieve clean, great-looking floors!

Long-Lasting, Reliable Performance

Each pad will clean up to 5,000 square feet, giving you lots of value for the dollar. Longevity is reduced when used on uneven surfaces or when solely focused on grout lines.

Compatible with Standard Floor Machines!

These pads are designed for use with standard 175 RPM floor machines, auto scrubbers, or oscillating machines up to 350 RPM. They are not designed for use with high-RPM or UHS machines.

Use on Multiple Types of Floors

Unitex® XTRACT pads can be used on ceramic and porcelain tile, VCT, epoxy, concrete, terrazzo, synthetic wood, stone, and rubber.

Usage ▼

Directions for Use:

The incredible cleaning properties of melamine foam create an unusually high level of friction when introduced to the floor. It is important to add water, a neutral cleaning solution or a degreaser to both the floor pad and to the floor in order to reduce friction upon startup

- Apply non woven pad driver side of melamine floor pad to floor cleaning machine, white melamine side facing down toward floor
- Be sure to check machine pressure to avoid premature wear of pad
- Avoid rough uneven surfaces which can wear out pad quickly
