Build powerful AI solutions 17x faster, then scale

Interplay is a drag-and-drop, low-code AI environment where innovation apps can be rapidly developed and commercialized through modularized, pre-built components – then pushed into production environments.

Low Code Platform for Supercharging Enterprise & Innovation Applications

Interplay Capabilities

Build Digital Applications

Build chatbots, Voice, NLP, AI, Blockchain and data applications faster.

Access to a Large Ecosystem of Software Components

Build chatbots, Voice, NLP, AI, Blockchain and data applications faster.

Connect to Internal Enterprise Systems

Access to various databases and cloud functions.

Deploy and Scale

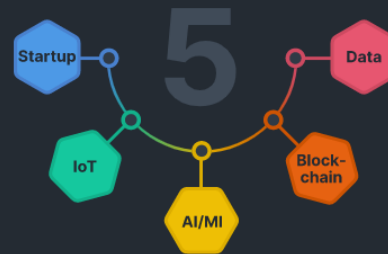

The technology is based on docker containers that are easily scalable across clouds and on-premise

Interplay Benefits

Designed for Speed

Prior versions of Interplay enabled customers to bring digital initiatives to market 17x faster, we believe Spirit will make it 30x faster.

Tap into the 5 Forces of Innovation

Building Innovative applications requires software components from Startups, AI/ML, IoT, Blockchain and Data Access. Interplay packages these five forces of innovation into one single drag and drop platform.

Up skill your Workforce

Leverage your existing teams to build faster and use complex state-of-the-art technologies via drag-and-drop software development

Enterprise Ready

Deployed and trusted by several fortune 500 organizations to run product software at scale. Works with scaling technologies such as Docker, Kubernetes and others.

Scale test performed using jMeter

Deploy at Enterprise Scale

Most low-code solutions are designed for quick prototypes and throwaway work. Interplay® changes that!

Build and deploy to any cloud or on premise. Powered by scalable technologies such as Docker and Kubernetes.

Interplay Components

63

Enterprise

Unlocks data stored in various silos inside the enterprise

43

AI/ML

Quickly build and test AI/ML models

21

Voice

Voice applications for Alexa and Google voice assistants

53

Headless Commerce

Taps into the power of headless commerce systems such as commerce tools and Iterate's own Interplay commerce

89

Startup Ecosystem

Speeds up dev cycles by tapping into functions offered by many startups

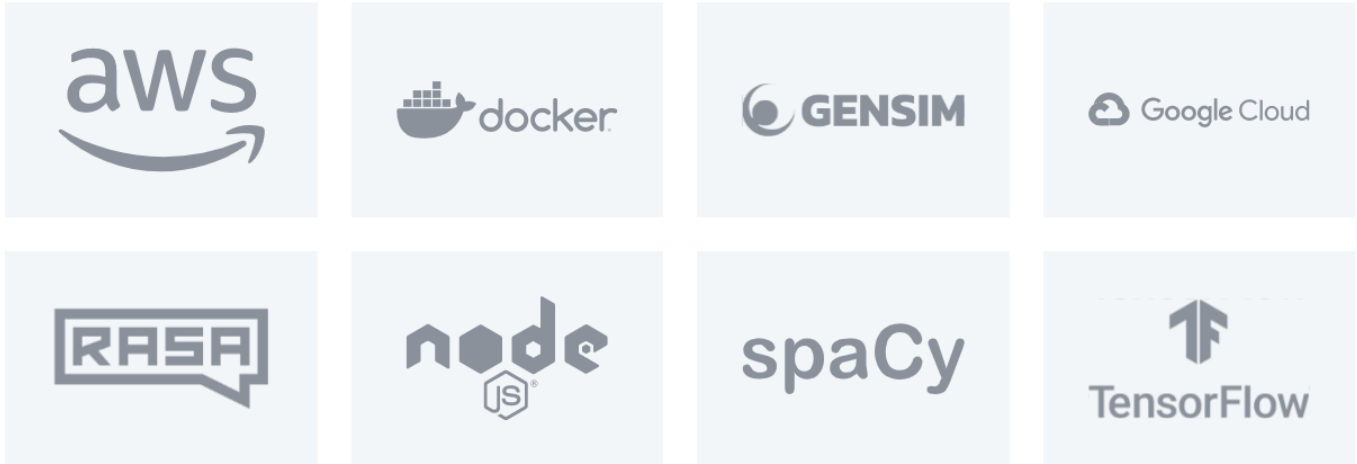

42

Conversations

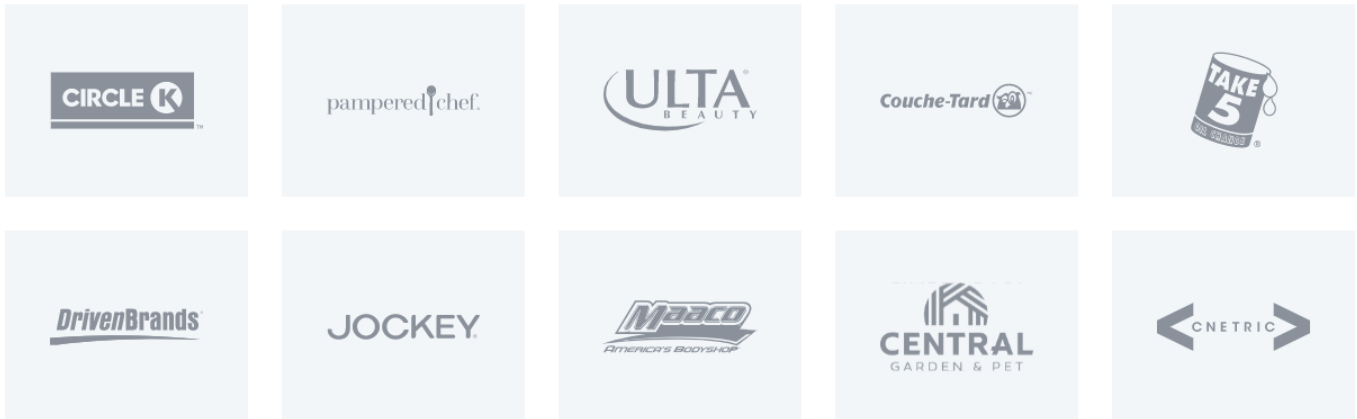

Communicate with shoppers via website, facebook, slack, SMS, viber, telegram and other channels; use ML/NLP technologies to handle conversations automatically

Plus access to thousands of community components

Some Interplay Technology Partners

Some Interplay Clients & Channel Partners
