Signals

Somewhere out there is a company with the perfect solution for you. Signals tracks over **15.8M companies** - from cutting edge startups to mature enterprises - with proprietary AI that sorts and evaluates funding, patents, headcount, and specific capabilities for each. We create and track the trends, associations, and directions for all these startups, with updates coming in every 15 minutes.

Data Visualizations

Signals plots millions of data points into easily understood trend graphs, maps, market share landscapes, and ranked lists for quick insights into any specific area of innovation and digital capability. These graphics are mobile-friendly and can be downloaded and imported into your presentation or research documents with a click.

Shared Searches

Collaborating with your teammates on finding technology solutions? Signals search results can be saved, shared, and annotated together with the people you invite to your project. Teamwork, dream work— you get it.

Trend Updates

Once you've found your perfect Signal, we'll email updates to you weekly, with new companies, trend updates, and the data points you need to stay on top of your innovation projects.

Signals Platform Stats:

15.8M

Companies Indexed for discovery and comparison

108.8M

Patents tracked to evaluate startups and enterprise solutions

2K

Collections to compare and grade technology solutions
