[Overview](#) [What's New](#) [Customization Tool](#) [Resources](#)

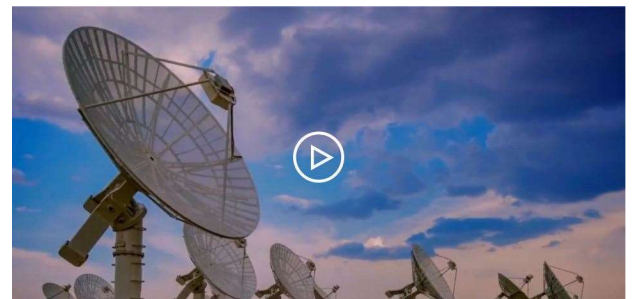

Personalize your hardware or software solutions with our 24/7 accessible online portal. Take advantage of this opportunity to promote your company's market awareness while eliminating custom setting rework each time a software upgrade is required. Explore a range of options to determine the best customization for your business.

yourID | Hardware

Customize your server or storage bezel to make the system look the way you want:

1. **Bezel:** Choose from hundreds of paint color options or provide your own.
2. **Badge:** Upload your company's logo to promote your brand using our popular badge shapes.

yourID | Software

Build your brand and simplify maintenance by customizing your software branding and settings one time, and your customizations will persist through firmware updates:

1. **Identity Module:** Update your BIOS/iDRAC logos or override the Dell default BIOS/iDRAC settings.
2. **Storage Brand Module:** Easily customize OneFS - web based management GUI.

HOW DESIGNS ARE BROUGHT TO LIFE.

View first hand the care and thought put into each bezel we create.

Now Offering PowerScale Customizations through yourID

We now provide de-branding and re-branding of Dell EMC PowerScale hardware and user interface through yourID. For more details on other storage products, please contact your sales representative.

PowerVault ME4 Series: De-brand or re-brand your bezel and/or PowerVault management software.

Unity XT: De-brand or re-brand your bezel and/or Unity XT management software, Unisphere.

yourID Customization Tool

Personalizing your OEM hardware and software is easy. For a comprehensive walk-through of the process, review our Getting Started Guide (/documents/platform-specifications/ENG0019137-Dell_yourID_Getting_Started.pdf).

1 Decide whether you want hardware and/or software customizations. Upload and preview your design online, and submit your project.

2 Quickly and easily review your project status for updates and approvals.

3 Once approved, let us know how you want to deploy and integrate your customizations.

Choose what to customize:

Bezel

ID Module

Storage Brand Module

Express
