

WELCOME TO UAB eMEDICINE

eMedicine connects you and your family with UAB's world-class care in new and convenient ways. We use telehealth technology to deliver quality care to you wherever you are on your mobile device or computer.

UAB eMedicine service requires a Wi-Fi connection to the Internet or a strong cellular signal. Click here for a list of Free Wi-Fi locations near you, provided by UAB Health.

If you have coronavirus or think you've been exposed - please do not go to the emergency room or visit a UAB Medicine outpatient clinic. Instead, call UAB HealthFinder at 205.934.9999 or toll-free at 1.800.822.8816 for instructions.

UAB eMedicine offers two types of online urgent care for common conditions such as cold/flu, sinus infection, female bladder infection, pink eye, vaginal yeast infection, back pain, skin conditions, and more.

ON-DEMAND URGENT CARE

On-Demand Urgent Care Online Questionnaire

Complete a short form and get a diagnosis and treatment for routine illnesses and common conditions, including any needed prescriptions. The cost is \$25, and you must be at least 18 years old.

Start questionnaire >>>

On-Demand Urgent Care Video Visit

Visit "face to face" over video with a trusted provider, similar to an in-office visit. Care providers are available to evaluate symptoms, make a diagnosis, recommend treatment, and send prescriptions to your pharmacy. We suggest this option if you think you have a more urgent common condition that may require a physical exam. The cost is \$59, and you must be at least 18 years old.

NOTE: A wired or Wi-Fi internet connection is recommended (UAB eMedicine is not responsible for data charges for Video Visits done through a cellular connection).

Launch video visit >>>

On-Demand Urgent Care Questionnaire (\$25/visit) On-Demand Urgent Care Video Visit (\$59/visit)

Comparison table between On-Demand Urgent Care Questionnaire and On-Demand Urgent Care Video Visit across various criteria like diagnosis, expanded conditions, and fees.

Scheduled Clinic Video Visit

This option allows your UAB Medicine primary care or specialty care provider to perform basic physical exams, diagnose common medical conditions, manage complex care, and provide personalized treatment plans "face to face" using technology. If lab work or imaging (such as X-rays) is needed, it will be ordered and done at another time. A smartphone (preferred) or computer with a web camera and Google Chrome installed is required.

Is this option right for you?

- Checklist of conditions for which Scheduled Clinic Video Visit is appropriate, such as 'You never had an appointment but you want to make one.'
