Acorn

main-release passing

A simple application deployment framework for Kubernetes.

- One artifact across dev, test, and production
- Simple CLI and powerful API
- Runs on any Kubernetes cluster

📄 Acorn is a work in progress. Features will evolve over time and there may be breaking changes between releases. Please give us your feedback in Slack, Discussions, or Issues!

⚠️ Caution: Consuming this project can expose you to chemicals, which are known to the State of California to cause cancer and birth defects or other reproductive harm.
