The ultimate backup

Your stored energy goes further when the grid goes down: smart circuit control extends average battery backup time during an outage by 40%.

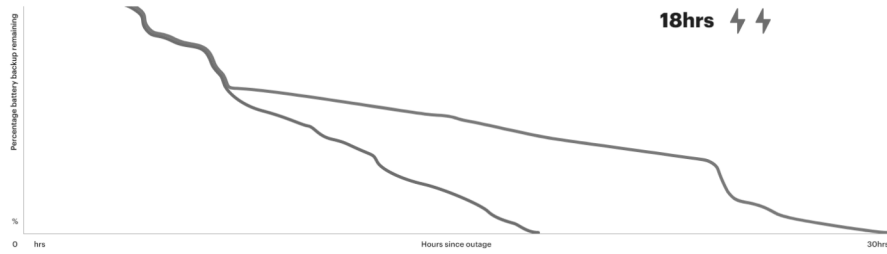

With SPAN

30hrs ⚡⚡⚡⚡

Without SPAN

18hrs ⚡⚡

Support

Results from an internal study of SPAN managing backup load priority in over 90 simulated outage situations. This is an example; backup time will vary based on differences in home energy demand and storage systems.

“A long-overdue, borderline genius product that puts much-needed control back into the hands of homeowners.”

SPAN

Built on innovation

Support

Built on innovation

SPAN reimagined the 100-year-old electrical panel to ready your home for electrification upgrades like solar, home battery, and EV charging equipment.

Robust hardware

Designed and tested to the most rigorous industry standards.

Intuitive software

Control and monitor everything from a smartphone or tablet with the SPAN Home app.

Actionable insights

Track and analyze energy usage by circuit for smarter, more informed decision-making.

Prepare your home for an electrified future

SPAN's one-of-a-kind energy management system enables whole-home electrification without a service upgrade.
