Ask your EMS sales rep for more information about our Machining and Fabrication capabilities that include CNC Lathes and Mills, Shearing, Punching, Drilling, Roll Forming, Deburring, Welding, Assembly and much more.

We take great pride in providing high quality hurricane and storm protection systems to our customers.

In 1995 we helped establish the [American Shutter Systems Association](#). The ASSA is constantly conducting research, development and testing to ensure that these hurricane protection products comply with the [FBC \(FL Building Code\)](#), [MIAMI DADE](#), [TDI \(TX Department of Insurance\)](#), [IBC/IRC](#) and [ASTM \(American Society of Testing Materials\)](#) Building Codes. These same codes allow us to provide the assurance that when you buy Eastern Metal Supply products, you get unsurpassed quality, value and peace of mind.

We are proud to unveil the new ASSA logo! We also welcome you to visit our [website](#), featuring our hurricane products, news and information.

We thank you for your continued support as we expand and improve the ASSA brand and line of products. It is our mission to bring you high quality, innovative hurricane protection products.

For many years EMS has been supplying vinyl fence fabricators with aluminum extrusions used as stiffeners and reinforcements in their vinyl fence systems. We have vertical aluminum post stiffeners that are almost universally accepted by all manufacturers' systems. Many of our lineal aluminum rail stiffeners have been designed to fit specific manufacturers' vinyl profiles, while others give the fabricator the flexibility to choose what they need for their specific jobs. The fact that many vinyl fence fabricators also fabricate aluminum fences or railings give them an advantage to combine orders with EMS to satisfy all of their needs.

OUR PRODUCTS

Window Treatments

- [Complete Window Treatment Section PDF](#)

For years EMS has proven to be a cost effective alternative in supplying aluminum extrusions to manufacturers of vertical blinds and roller shades. Many types of anodized tracks and pinion gears are available for immediate shipment most often on company trucks saving additional freight charges for our customers.

VERTICAL BLIND TRACKS:

- Standard, Lite, Heavy V-Top Tracks
- T-Top Tracks
- Decomatic Tracks
- German Tracks

PINION GEARS FOR VERTICAL BLIND TRACKS:

- 3, 4, and 8 Prong Pinion Gears
- Decomatic Pinion Gear

Our extruded aluminum hem bars and painted facias typically work with several different manufacturers systems.

Of interest to roll shade fabricator, EMS has recently invested in equipment to efficiently apply a high quality double sided tape to our roller tubes. These taped roller tubes can now be purchased direct from stock. Roller tubes without tape will continue to be available in addition to the pre-applied taped tubes.

Taped Keyed Roller Tubes:

- 1", 1.25", 1.50", 2", 2.5"

Non-Taped Roller Tubes:

- 1.25", 1.50", 1.55", 1.58", 2.00", 2.50", 3.165"
