

PowerDMS Mobile App

Put crucial information in the palm of your hand.

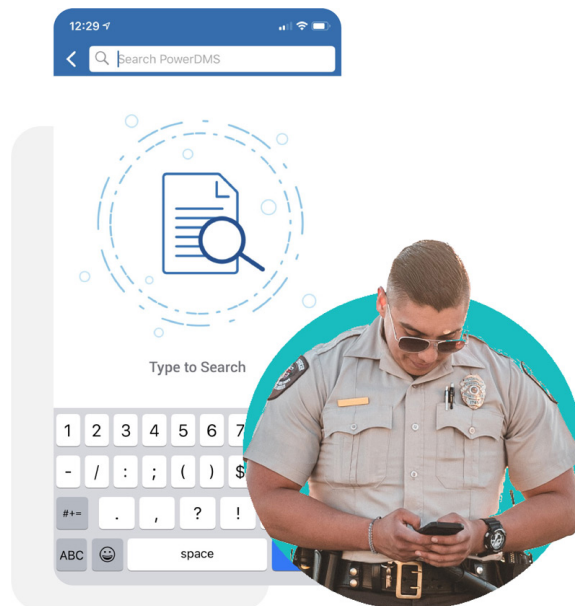

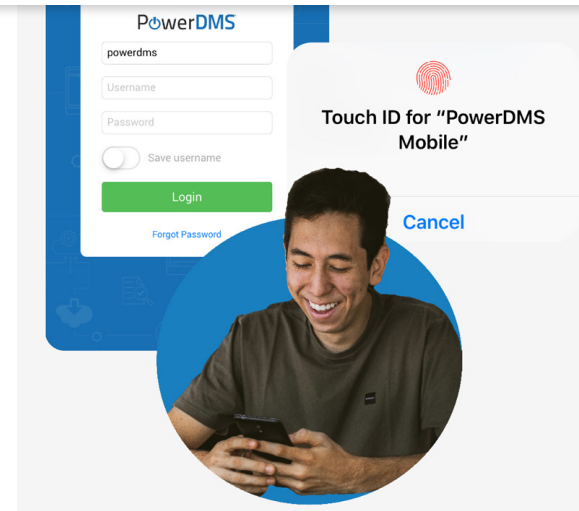

More than just a mobile app

The PowerDMS mobile app gives employees access to the information they need, wherever they are, from the convenience of any mobile device. When policy and compliance documents need to be as mobile as your workforce, the mobile app delivers.

Simplify How You Access Crucial Information

View your most important documents anytime, anywhere with the PowerDMS Mobile App. You can increase your mobile readiness by putting the most up-to-date versions of your policies, procedures and other crucial information into your staff's fingertip

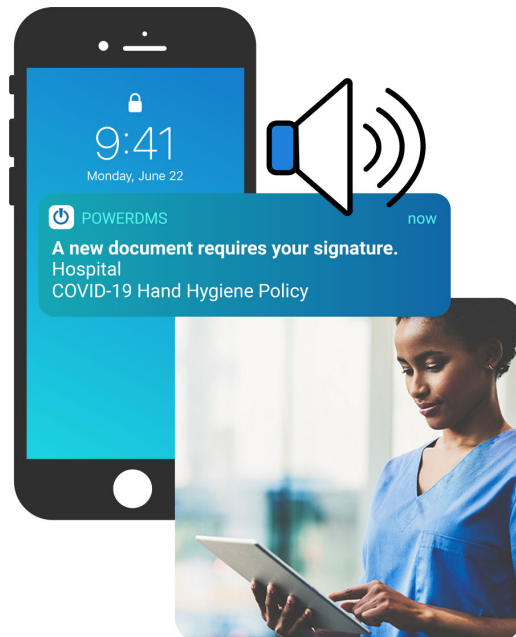

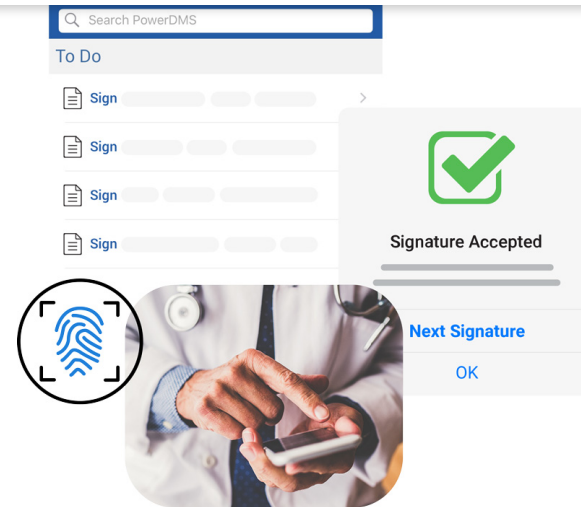

Quickly Find Information on the Go

Employees can search for content by keyword or tag. All content is indexed for full-text search, so results include all documents with a matching word(s). They can view or sign off on various file types from their mobile device: Word, PowerPoint, PDF, Excel, or videos.

Increase Accountability and Compliance

Avoid the cost and hassle of printing out paper copies for your employees to sign. With the PowerDMS Mobile App, you can sign off on critical policies simply by using your fingerprint.

Real-time Communication

As soon as a policy update is published, mobile users receive a push notification of the new version requiring their signature. This real-time communication helps your employees do their jobs more safely, promotes accountability, and mitigates the risk of non-compliance.
