ABOUT US

OUR VISION

With our technology and brilliant team, we would like to change the medical industry for self care, healing and quality care through non-invasive alternatives such as Hyperbaric Oxygen Therapy.

OUR MISSION

Our mission is to provide the upmost care and educate the world on alternative medicine. We are dedicated to helping patients and recognizing clients healthcare needs.

OUR VALUE

Under Pressure Hyperbarics was founded by experts in the field with over 25 years in hyperbaric medicine combined. We believe in evidence-based medicine and use FDA, PVHO, ASME and National Board approved chambers to safely treat all of our patients.

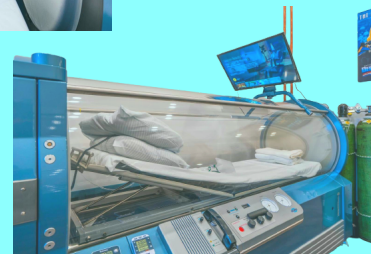

MEET OUR TEAM

WHAT WE DO

Hyperbaric Oxygen Therapy

Hyperbaric medicine is a medical treatment using oxygen and pressure to improve the body's natural healing process, in which pressure greater than sea level is necessary to enhance the healing effects for clients. This is a noninvasive and painless treatment inside a chamber where you will lie down. In the process, the patient will inhale 100% oxygen while in a pressurized chamber, allowing the body take in 100% oxygen towards where your body needs it most.

Benefits of Hyperbaric Oxygen Therapy

- Fills body with 100% Oxygen
- Boosts Immune System
- Speeds up wound healing process
- Increases blood flow and Circulation
- Decreases Inflammation and Pain
- Repairs and Rejuvenates tissue in the body

Physician Always on site

WHAT WE DO

Wound Care Center

Under Pressure Hyperbarics has partnered up with Wound Institute of America to provide world class wound treatment with Hyperbarics therapy. The combination provides a straight line system for your healthcare goals.

IV Therapy

Sit back, relax, and enjoy nutrients straight to your blood stream! IV hydration therapy is a common procedure in our office where people come to rehydrate their body. In short, it's the fastest, most efficient delivery method to distribute vital fluids & nutrients throughout your body.
