

Training

Advanced EOD Training: Special Operations/ Tactical Operations, Manual Techniques, Counter-IED, Energetics and HME, MWD/K-9 Courses for Department of Defense/U.S. Government, Law Enforcement/Public Safety Bomb Technicians, and Coalition Partner EOD Operators

Point One advanced EOD training is the most realistic and relevant training conducted on friendly soil. We utilize the most current operational information available. We don't teach just theoretical science—we teach operators how to apply the science. We combine subject matter experts (SMEs) with EOD and SOF operators to create a training team with unmatched capability and experience to deliver a vigorous and challenging training program. Our established courses encompass topics across the operational spectrum of EOD mission sets, or we can tailor a course to meet your specific needs.

Point One's philosophy is to train hard so you can fight easy. So expect a fast-paced, practical-based advanced curriculum each time you train with us that will ensure the best possible retention of information upon completion.
