

IDENTITY-DRIVEN BUSINESS ENABLEMENT, DONE RIGHT.

Advance your organization with our range of identity services. Discover how our identity verification technology can help you achieve enterprise objectives while removing risk.

Combat fraud with Dynamic Decisioning.

Fraudsters attack with relentless velocity and ingenuity. AuthenticID keeps you one step ahead with the industry's only dynamic, near-real-time, SIMACT-like fraud monitoring and response service. Learn how we help fraud attacks the instant they emerge by reflecting thousands of machine learning signals generated by our platform into new algorithms defined by our forensic fraud experts and data scientists.

Our Dynamic Decisioning service is offered as a daily, weekly, or monthly response frequency based upon your business requirements for each use case.

ID Authentication Remediation without bias.

AuthenticID empowers you to automate ID data processing via proprietary machine-learning models and world-leading ground truth data sets built for remediation processing/research purposes. This includes gender and race bias testing on provided data sets, particularly for ID verification and ID Photo-to-Biella biometric matching.

We can also help you improve your KYC workflow for existing customers via remediation.
