

EAGLE

FOR HOME & BUSINESS

GET STARTED

We have deployed enough solar panels in the U.S. to power the equivalent of 2.8 million homes. Nationwide homeowners, small business owners, and retailers have already chosen EAGLE Modules. We now add energy storage to the mix. Pairing solar with energy storage is an easy way to decrease the cost of owning a home or business. As you begin the process of selecting solar panels, insist on reliable, performance-proven EAGLE Modules from JinkoSolar.

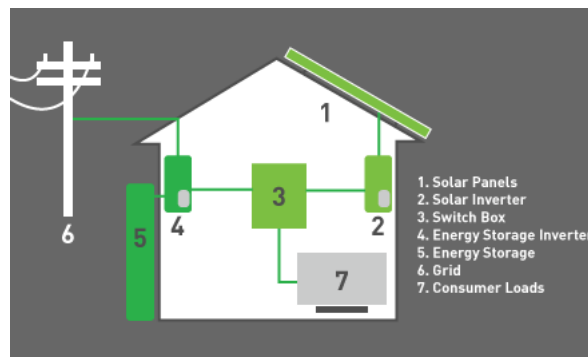

SOLAR & STORAGE 101

WHAT TO EXPECT

Home and business owners add solar and energy storage to save on electricity bills, cut operating costs, and lock in energy rates. Start by learning some basics that can help you decide whether solar and energy storage are right for you

✓ HOW THEY WORK

Solar panels generate DC power when exposed to sunlight. They are mounted on your roof with racks and paired with an inverter or several microinverters, which convert the DC power into AC power that your home or business can use. Energy storage systems use batteries, which store energy generated by the grid or by solar panels. These batteries can be installed in your garage or on the side of your house and are paired with an inverter which converts the power to AC power that your home or business can use.

Solar system overview

Features roof mounted panels, inverter (or several micro inverters), a power meter, and batteries.

WHY JINKOSOLAR IS THE BEST CHOICE

JinkoSolar has been a top performer in the industry's most respected third-party lab test for seven consecutive years. The company has also been rated 100% recognized and bankable by respondents to a Bloomberg survey sent to banks, construction companies, and utilities. Backed by advanced R&D, JinkoSolar offers an assortment of panels to suit your needs from sleek, all-black, ultra-powerful panels to more cost-effective models.

FINANCING

There are many ways to go solar. The easiest is a cash purchase, which offers the fastest path to free electricity. However, many financing options require no out-of-pocket expense.

LOAN

Many competitive loan offerings with low interest rates and up to 20 years.

PACE

Loans repaid on property tax bill over a term up to 25 years.

LEASE

Power Purchase Agreement: No money down, no out-of-pocket expense. Immediate savings on utility bill.

SALES FORM

INTELLIGENT LIVING

Today's buyers demand intelligent, intuitive homes. As of 2020, a California mandate requires every new home to have solar. People are seeking a more efficient lifestyle. That might mean living small or living smart. We have partnered with Green Builder Media and Innovative Home Builders to demonstrate solar powered next generation living.

SHELTER DYNAMICS

Shelter Dynamics features two small-footprint, intelligent, net-zero, and sustainable homes, beginning with its two existing prototypes: the Flex House and the Arc House. The Arc House combines the economy and simplicity of small footprint living with cutting-edge building science. Smart, self-sufficient, and compact, the net-zero home integrates many facets of sustainability into one compelling and beautiful package. The Flex House is a model for “right-sized” living in a small, flexible space that is connected, intelligent, resilient and sustainable. The Flex House boasts an integrated smart + solar system as well as water-conserving products and fixtures and non-toxic, sustainable materials to ensure healthy indoor spaces.
