

EXACT 3D

\$349.99

★★★★★ (14 customer reviews)

LIGHT AND QUIET. THE BEST ALL-MACHINED METAL SIGHTS AVAILABLE.

The **Exact 3D** comes in at only 7 ounces (scope not included). It features a 6" extension bar with our click-in precision locators, and a fast-pitch elevation rod for lightning fast and precise yardage settings. There are 3 macro-elevation positions for vertical body, combined with 2 inches of travel.

Exact 3D sight features:

- 6" bar
- New lockdown knob
- All machined parts
- All axis adjustments
- Fast pitch elevation rod
- Dual adjustable indicators
- Spring loaded detent system
- Includes laser engraved sight scales 1-11
- New Mathews Archery Bridge-Lock sight bar option
- Removable yardage plates on both sides for easy sight scale installation
- Elevation that can be used with or without a click when ordered by phone
- The most precise micro-adjust windage unit available; under .001 per click with no excess travel

Well built sight!

Just received this sight last Sat. It is a compact, well built sight with a silky smooth elevation adjustment, really precise windage adjustment. It was super easy to dial in on my V3X. the bridgeloek dovetail fits well and I love how compact it is.

The only change I would like to see is the third axis adjustment is a bit imprecise as compared to some. But once dialed in, it is a great site. I brought it for 3D and outdoor field, but wouldn't hesitate to hunt with it.

Awesome Sight & Company

I ordered the Exact 3D sight along with the vented scope and had it within 3 days! Hands down the best customer service I have experienced in a long time. The sight itself is made like a tank but yet very light weight. The 1st, 2nd and 3rd axis adjustments were done in a matter of minutes. Windage and elevation adjustments are very crisp and precise. The finish is outstanding. All in all its the best sight I have used in my 40 years of archery. The scope is machined out of 1 pc and is also very light. The elevation slot in the scope for the mounting rod is a unique feature that will come in handy on longer shots if I should decide to go that route.

B3 Archery is a class act and tops in the industry and hands down the best customer service. All of my emails were answered within minutes and I was able to speak with the shop personell when I ordered.

Great Job B3!

Exact 3D!! Solid performance at a great price!

Two years with my Exact 3D and I couldn't ask for a better sight. Streamlined, lightweight, but solid as a rock. The crisp vertical movement and windage elevation adjustment are very precise. All this at a price that cannot be matched for a top end archery sight. Match it up with a B3 Exact Scope and lasered sight scales and you have a winning combination!

B3 NEVER DISAPPOINTS

Can't say enough great things about this sight!!!

I switch out the 1 pin 3D housing for the 4 pin hunter housing in different seasons!!

LOVE IT!

Just bought this and loved it as soon as I opened the box! Super durable. Doesn't seem weak or flimsy. Very easy to setup and very easy to set the axis levels. VERY VERY HAPPY WITH THIS SITE!

Awesome sight
Great sight, easy adjustment, no vibration or noise related issues, definitely worth adding to your bow
