

PIPELINE INSPECTION (CCTV)

Pro-Vac's CCTV inspections are instrumental in determining the structural condition of your pipe as well as locating cross-connections, overflows, defects, and obstructions.

PIPELINE INSPECTION (CCTV) EXPERTS

You need to see it to fix it.

- Pro-Vac's CCTV inspections determine the structural condition of your pipes and locate overflows, defects, and obstructions
- CCTV cameras view inside pipes from 2" to 200" in diameter
- Our cameras inspect sewer pipes, stormwater pipes, ducts, lateral launches, and side sewers
- Pro-Vac's CCTV Team is certified by NASSCO for pipe, lateral, and manhole inspections
- Pro-Vac has the largest fleet of CCTV trucks in the Pacific Northwest, which translates into availability and reliability
