### About this app

The app helps you manage your services running on Google Cloud directly from your Android phone or tablet:

- \* Stay connected to the cloud and check billing, status, and critical issues.
- \* Create your own custom dashboard to produce an overview of your Google Cloud services.
- \* Monitor the state of your Compute Engine and **App Engine** resources with the ability to SSH into your VMs.
- \* Access to Cloud Shell to perform any Google Cloud (gcloud) operation.
- \* View and respond to incidents, errors, and logging....

No workloads
-  **Services & Ingress** >  
No services

Notice: Over the next few months, we're reorganizing the App Engine documentation site to make it easier to find content and better align with the rest of Google Cloud products. The same content will be available, but the navigation will now match the rest of the Cloud products. If you have feedback or questions as you navigate the site, click Send Feedback.

## App Engine

Build monolithic server-side rendered websites. App Engine supports popular development languages with a range of developer tools.

New customers get \$300 in free credits to spend on App Engine. All customers get 28 instances in standard environment free per day, not charged against your credits.

[Try App Engine free](https://console.cloud.google.com/freetrial) (<https://console.cloud.google.com/freetrial>)

[Contact sales](https://cloud.google.com/contact) (<https://cloud.google.com/contact>)

- ✓ Free up your developers with zero server management and zero configuration deployments
- ✓ Stay agile with support for popular development languages and a range of developer tools
- ✓ Explore more products in our [serverless](https://cloud.google.com/serverless) (<https://cloud.google.com/serverless>) portfolio

### KEY FEATURES

#### Key features

##### Popular programming languages

Build your application in Node.js, Java, Ruby, C#, Go, Python, or PHP.

##### Fully managed

A fully managed environment lets you focus on code while App Engine manages infrastructure concerns.

### DOCUMENTATION

#### Documentation

##### GOOGLE CLOUD BASICS

##### Choosing the right App Engine environment

Learn how to run your applications in App Engine using the flexible environment, standard environment, or both.

[Learn more \(/appengine/docs/the-appengine-environments\)](/appengine/docs/the-appengine-environments)

## GOOGLE CLOUD BASICS

**App Engine standard environment**

See how the App Engine standard environment makes it easy to build and deploy an application that runs reliably even under heavy load and with large amounts of data.

[Learn more \(/appengine/docs/standard\)](/appengine/docs/standard)

## GOOGLE CLOUD BASICS

**App Engine flexible environment**

Find out how App Engine allows developers to focus on what they do best: writing code.

ALL FEATURES

**All features**

Popular languages	Build your application in Node.js, Java, Ruby, C#, Go, Python, or PHP.
Fully managed	A fully managed environment lets you focus on code while App Engine manages infrastructure concerns.
Powerful application diagnostics	Use Cloud Monitoring and Cloud Logging to monitor the health and performance of your app and Cloud Debugger and Error Reporting to diagnose and fix bugs quickly.
Application versioning	Easily host different versions of your app, and easily create development, test, staging, and production environments.
Application security	Help safeguard your application by defining access rules with App Engine firewall and leverage managed SSL/TLS certificates by default on your custom domain at no additional cost.
Services ecosystem	Tap a growing ecosystem of Google Cloud services from your app including an excellent suite of cloud developer tools.

## PRICING

## Pricing

App Engine has competitive cloud pricing that scales with your app's usage. There are a few basic components you will see in the App Engine billing model such as standard environment instances, flexible environment instances, and App Engine APIs and services. To get an estimate of your bill, please refer to our [pricing calculator](#) (/products/calculator#tab=app-engine).

App Engine runs as instances within either the standard environment or the flexible environment.
