

# AXIS OVERVIEW

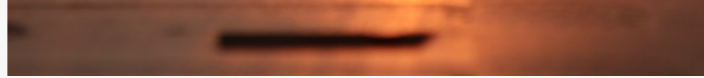

**AXIS is powered by our parent company, ORIGIN Engineering**, an engineering firm that focuses on providing contract engineering and fabrication services to over 10 industry verticals. The AXIS group solely focuses on product development and manufacturing to help our partners densify their network. Through vertical integration and a wide range

of in-house manufacturing and internal engineering resources, we are able to provide high-quality and cost-competitive products. We are a Platinum ISO 9001 certified company and our team of engineers are adept in codes such as AASHTO, TIA, AWS, AISC, and GR-487. All products are designed, built, and assembled at one of our three facilities located in the US.
