Manage your Pivotal satellite data terminals and control your costs with Pulsar[®] Service Management Portal

Pulsar is a data management service that lets you monitor and control the data being used by your satellite services, helping you manage your network and control your costs. Best of all, it's included with any active data service as part of the **Pivotal Advantage**.

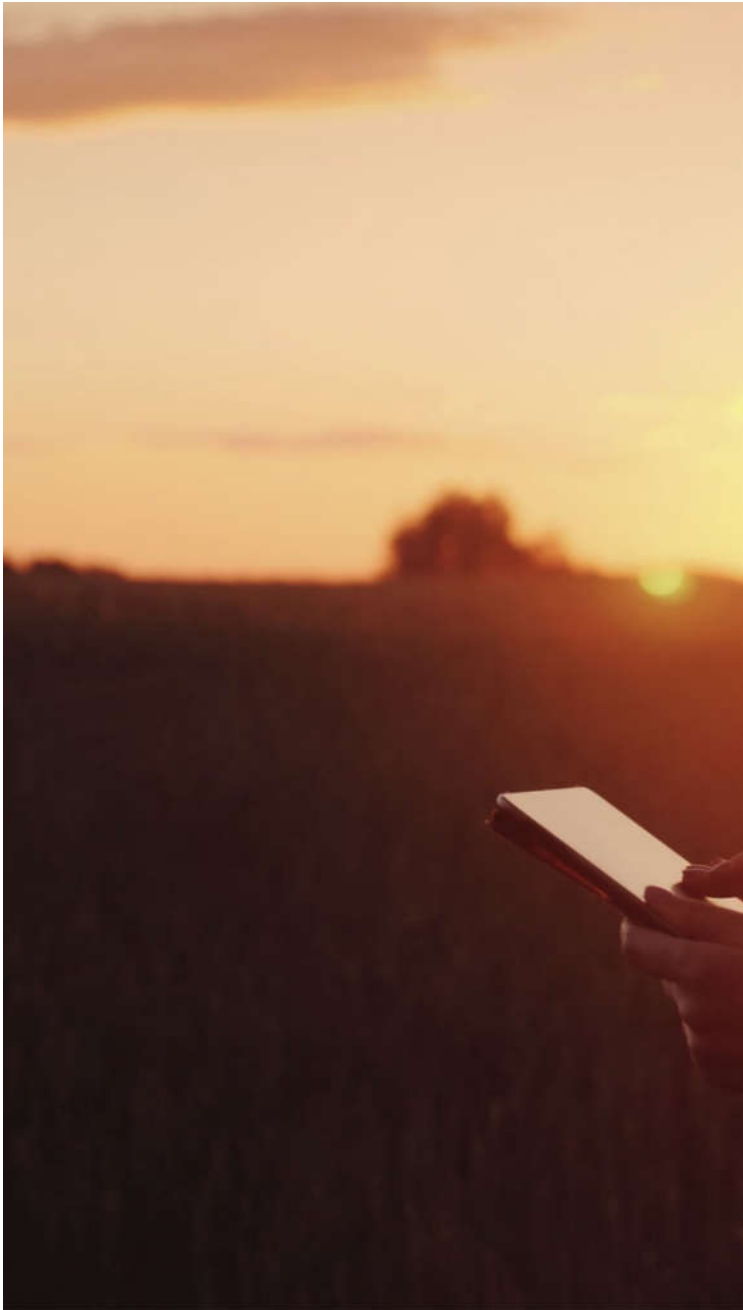

Key Features include:

- Web-based self-service dashboard
- Set usage thresholds with alerts and cost control limits
- Real-time terminal and data information for troubleshooting
- Self-manage firewall rules

Pulsar is included at no additional fee with the following active Pivotal services:

- Inmarsat BGAN
- Inmarsat BGAN M2M
- Inmarsat Fleet One
- Inmarsat FleetBroadband
- Iridium Certus
- Thuraya IP
