

# Meet Aidia™

**A new name for the AdhereTech smart bottle system  
you and your patients rely on!**

The Aidia System from AdhereTech is your trusted partner to improve adherence, enhance patient support and keep patients on therapy longer.

**With thanks and appreciation from your friends at AdhereTech**, we hope you enjoy these handy items to help you stay on track everyday, whether you are in the office, working from home or out and about.

# Always On Time With Aidia

The Aidia System is inclusive of the easy-to-use functionality and services you expect from the AdhereTech smart bottle system:

**The Aidia Smart Bottle** with customized smart alerts that improve adherence and regulate dose-time behavior.

**Aidia Live Specialists** providing technical support and continuous connection to care.

**The Aidia 2-way Messaging Platform** for HIPAA compliant patient reminders and communications.

**The Aidia Partner Portal** for easy enrollment, access to adherence data, and escalation alerts for real-time patient interventions.

# Optimizing adherence with revolutionary smart technology

Connecting patients to care with medication reminders and early intervention

## Adherence, reimagined

AdhereTech's Aidia System empowers patients and healthcare teams to achieve optimal medication success through smart reminders, monitoring, and continuous connection to care.

### How our revolutionary system works:

**Easy-to-use Aidia bottle** with prompts that regulate dose-time behavior.

**Aidia live specialists** provide continuous connection to care.

**2-way messaging platform** for real-time patient communications.

**Data-driven care escalations** alert pharmacy and care teams of needed patient interventions.

### A measurable difference in health outcomes

The Aidia system is proven to help patients stay on schedule, stay on therapy, and feel supported throughout their medication journey. Consistently proven results across multiple therapies and disease states, published in peer-reviewed medical journals and by leading specialty pharmacies.

Results compared to patients not using the system:

**12%+**

Increased dose adherence<sup>4</sup>

**1-2**

Additional fills per patient, per year<sup>1-4</sup>

**26%↑**

Increased time on therapy<sup>2</sup>

**4.7** out of **5**

Patient satisfaction<sup>4</sup>
