OVERVIEW

Our patented technology is the only product that will disable Active or Dynamic Fuel Management without reprogramming the factory ECU. Full power delivery all the time without factory warranty concerns.

Features:

- Range AFM/DFM Disabler keeps you in full power 100% of the time.
- Simply plug into your onboard OBD-II port and it instantly begins working to eliminate the AFM system.
- The power and control you need in any situation.
- The Range AFM/DFM Disabler does not reprogram your factory ECU.
- Leaves no trace. Unplug it to return to factory settings
- Fits all V6 and V8 General Motors (GM) active or dynamic fuel management vehicles, includes cars, trucks, and SUVs.
- This device does not currently support the 2022 Refresh model trucks or SUV's

About Range Technology

Range Technology was founded in 2010 with the goal of providing custom Active Fuel Management solutions for GM vehicles that did not re-flash the factory ECU. Range now has modules to control GM AFM, and GM/Ford start-stop systems.

SPECS

EMISSIONS

This part is legal under the provisions of EPA's Tampering Policy dated November 23rd, 2020. The company has reasonable basis (test results) to verify that this product allows the vehicle to operate within legal emissions standards and is therefore legal to be sold for on-street use in all states that accept the legal provisions of the Clean Air Act and the EPA Tampering Policy. This product is NOT LEGAL FOR SALE OR USE IN THE STATE OF CALIFORNIA. Testing with the California Air Resources Board, in order to achieve 50-state compliance, is pending with CARB. Once testing is complete with California, and an E.O. number is issued, this product will be updated to 50-state legal status.

★★★★★ **AFM/DFM Disabler**

By Chuck T. on June 4, 2021 | **Verified Owner**

Like night and day after install. No more throttle hesitation when passing or when I just need the extra few seconds without waiting for the other four cylinders to kick in. The power is there when I need it. I haven't suffered any loss of gas mileage to speak of while driving normal speeds. I haven't experienced any battery drain either especially during the height of the pandemic where I didn't even start or drive the Suburban for several weeks at a time. Zero battery drain. Oh and when you are behind that idiot going really slow on the interstate
