## WORLD CLASS MANUFACTURER OF QUALITY GARAGE DOOR HARDWARE

Guardian Access and Door Hardware is a vertically integrated manufacturer of Garage Door Hardware. Aluminum & zinc die-casting, steel stamping, plastic injection molding, bearing & roller production, cable sizing & cutting and steel rolling are performed at Guardian ISO 9001 certified factories. All tooling is made at the each of the plants to ensure component quality.

Pallets or boxes of standard garage door hardware can be made and stocked at a local Guardian DC based on customer forecast needs.

14GA & 18GA hardware kits for standard door sizes are available. Proprietary configurations can be made and carried upon request.

Guardian's steel stampings use galvanized steel or are zinc coated for additional corrosion protection.

Aluminum die cast alloy (A380) is used for Guardian die castings.

To purchase hardware: contact your local sales rep, send a message to [info@adhguardian.com](mailto:info@adhguardian.com) or call (956) 998-4011.
