Easily embed DeFi into your app

Easily embed DeFi into your app

Combine and customize features from our platform to suit your business needs

Global fiat on/off-ramps

Automatically convert local fiat into stablecoins pegged 1:1 to USD. Avoid having to send your users away from your app to on-ramp into your products.

[Learn more >](#)

Crypto yield accounts

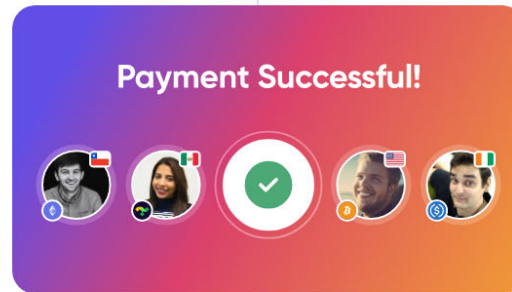

Monthly Earnings

Crypto yield accounts

Launch an interest-bearing stablecoin account, yielding 3-6% APY.

Yield strategies are curated by Conduit to only include protocols evaluated for security, transparency, liquidity and APY.

[Learn more >](#)

Payments & transfers

Allow cheaper, faster remittances without holds.

Enable cross-border B2B payments across multiple fiat currencies.

[Learn more >](#)

Powerful wallet services

Instantly create user accounts to let users hold value in multiple cryptocurrencies.

Easily allocate funds across integrated DeFi protocols, and track transactions in real time.

Available Balance
\$245,768.89

Send Receive

+0.02% +3.02% +4.02%

The image shows a digital wallet interface with a gradient background from orange to purple. At the top, it displays 'Available Balance' followed by '\$245,768.89'. Below this are two buttons labeled 'Send' and 'Receive'. At the bottom, there are three small circular indicators with icons and percentage values: a green icon with '+0.02%', a blue icon with '+3.02%', and a yellow icon with '+4.02%'.

Build products your users will love

Our end-to-end platform reduces development complexity, so you can focus on user experience

Crypto Wallets Interest Bearing Accounts P2P Transfers

The image shows three rounded rectangular buttons with a gradient background. The first button is labeled 'Crypto Wallets', the second 'Interest Bearing Accounts', and the third 'P2P Transfers'.
