a little girl couldn't speak. so we listened.

unspoken symphony™ was created for all those who struggle to express themselves verbally. Inspired by a little girl who can't speak, it transforms artwork into an original melody, giving the world a chance to communicate and connect with loved ones like never before.

It began with a girl named Riley and a commitment to understanding the challenges families face. Riley is living with Lennox-Gastaut syndrome and tuberous sclerosis complex, two rare and severe forms of epilepsy that often cause seizures. She's never been able to speak. Riley's dad once told us, "It's not easy to get to know someone who can't talk. It teaches you to pay a lot more attention to little things." His words inspired the idea for *unspoken symphony*.

We learned that many children and adults who struggle to express themselves verbally often turn to art and music as a form of self-expression. *unspoken symphony* offers a unique way to bridge the two, creating a symphony of sound that gives voice to a resilient community.

"It's not easy to get to know someone who can't talk. It teaches you to pay a lot more attention to little things."

Tim, Riley's dad

MP4 video file and customized sheet music—yours to keep!

how does it work?

It took a little bit of magic, a touch of inspiration, and a team of experts to build the breakthrough software behind *unspoken symphony*.

The software analyzes the shapes, lines, brightness, contrast, dominant colors, and density in each piece of art. It uses that information to determine the tempo, chords, musical style, timing, and pitch for each melody created, so each one is unique.

Simply upload your artwork and within seconds, your artwork will be transformed into a magical melody of sound and animation! But don't stop there. You also have the option to:

1. Play with different musical instruments
2. Be a featured artist in our gallery
3. Receive your very own MP4 video file and customized sheet music

Try it! It's fun and free for everyone to use!
