

# let's get started!

Snap a picture of your artwork with a cell phone or mobile device, then fit it to the frame. Scanned .png or .jpeg files work, too.

## for best results:

- Take an overhead photo of your artwork on a flat surface against a solid background, and use natural light to avoid shadows
- Crop, rotate, and brighten your image at the next step
- Crop out any background textures or personal information, such as last names

upload your artwork

or drag-and-drop a .png or .jpeg here
