

## About Us

### About Sonic Healthcare USA

Following the lead of Sonic Healthcare Ltd., Sonic Healthcare USA follows a federated model, which allows each laboratory to be its own independent entity, whose management and medical team are united in Sonic Healthcare’s common values. This model allows our laboratories to operate autonomously, responding to the needs of the

local medical communities they serve, tailoring their offering to meet the demands of community physicians.

Our success owes much to the fact that Sonic Healthcare companies are recognized as quality diagnostic practices that have remained true to the ethical principles of the medical profession.

We believe that no single corporate head office has the intimate knowledge needed to deliver the customized services required by each individual medical practitioner. Decisions need to be made at the local level to ensure rapid and sensitive responses to the needs of those we serve.

### Medical Leadership

Medical Leadership facilitates the highest standards of professional and operational excellence for the doctors and patients that we serve.

### Our Values

Each laboratory in the United States is an independent entity with its own management and medical team that are united by Sonic Healthcare's common values.

### Foundation Principles

Sonic Healthcare's Foundation Principles are shared across the entire organization, including Sonic Healthcare USA.
