

Our Divisions  Our Divisions 

Our Divisions

Sonic Healthcare USA believes that healthcare is not just another industry. Achieving and maintaining excellence in healthcare demands a ubiquitous, supportive culture.

We invest a great deal in nurturing our culture across the entire organization, for the ongoing benefit of our referring doctors and patients. We believe that our federated model, shared across the Sonic Healthcare umbrella, allows for localized responses to the medical communities that we serve, tailoring our offerings to meet the demands of individual communities, instead of forcing an outside opinion onto our patients.

We are aware that we owe our corporate standing to the achievements of our people and our practices. It is no accident that we are structured to encourage local management autonomy. Decisions need to be made at the local level to ensure rapid and sensitive responses to those we serve.
