Legacy Pro S

The Legacy Pro S is everything you love about the Legacy Pro, but in a Standard Shape Design. It is unmatched in its balance between spin and power amongst Standard Shaped Paddles. A true versatile paddle that can reset the ball and apply power to those shots that require a little more oomph. The Toray t700 carbon fiber face mixed with the special layering combine to make this paddle stand out amongst the rest. The core has been modified to help reduce vibration for those players looking to stay away from pesky arm injuries. Designed specifically to be well balanced fresh out of the package. We have engineered the Legacy Pro S to withstand lots of stress at the handle. The thermoforming seal with foam takes the stability of the paddle to new heights in the Pickleball Industry. Take your game to the next level with this top of the line carbon fiber paddle. The best just wasn't good enough....until now! USAPA approved April 25, 2023.
