

Meta Registry

Our Meta Registry is an online platform that seamlessly connects disparate environmental markets and registry systems around the world to mitigate the risk of double-counting and double-claiming of credits.

Market Participants

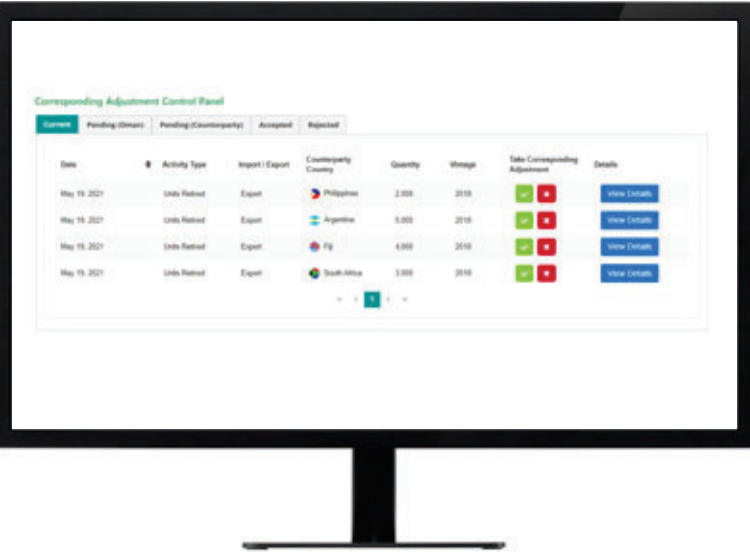

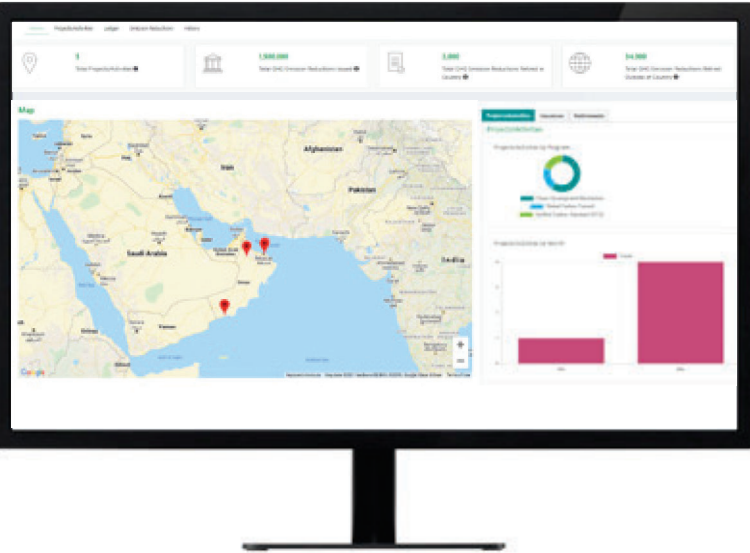

Observer Participants

- Governments
- Multinational Institutions

Program Participants

- Governmental Programs
- Voluntary Programs

Key Platform Benefits

- Reduced risk of double-counting and double-claiming
- Jurisdictional ledgers
- Corresponding adjustment tracking
- Internationally Transferred Mitigation Outcome (ITMO) tracking
- Peer-to-peer interaction; no middlemen
- Efficient and cost-effective

Dashboard

By connecting to the Meta Registry, participants have access to an integrated dashboard, enabling them to view all data, notifications and metrics for their respective jurisdiction or program.
