Industry-leading innovative **AutoML** Matching Engine

Utilizing millions of real data from Industry, Operations, Organizations, and Suppliers, the SoftCo **AutoML Machine Learning** engine 'learns' and improves based on 250+ match 'patterns' and applies this automation to SoftCo **Smart Matching** models, including tolerance, aggregation, and confidence match criteria. SoftCo's Smart Matching engine facilitates the automatic matching of POs against invoices, and the **3-Way Match** incorporates Receipt-Based Matching against GRNs and BoLs.

The **Smart Coding** and **Smart Routing** of invoices, optimized by AutoML based on continuous learned patterns, and brings PO levels of automation to Non-PO invoices. SoftCo's Smart Coding engine automatically codes Non-PO invoices with the click of a button, while Smart Routing directs payment to the correct cost center based on historical invoices.

The results are unrivaled, and the savings are exceptional. SoftCo delivers 90% straight through processing for PO invoices and 89% faster processing of Non-PO invoices.
