## Cancer Resource Centers

The staff of the Norton Cancer Institute Resource Centers understands that cancer affects the entire family, not just the person diagnosed. That's why the centers offer up -to-date information on cancer prevention and treatment, as well as a variety of support services for cancer patients and families. Patients receive personal attention and support services to address physical, emotional and spiritual needs before, during and after cancer treatment.

Quality of life is as important as longevity, and the Norton Cancer Institute Resource Centers are committed to helping with both. With the mission to blend humanity with technology, the centers offer as much comfort as information, including:

- ▶ Community groups to provide emotional support and educational counseling
- ▶ Free classes and seminars by leading professionals on an array of cancer-related topics
- ▶ Private educational sessions with oncology-certified nurses

All of the centers' resources are available to cancer patients and family members who want to learn more, ask questions and find hope. Other free support services offered include:

- ▶ Massage therapy
- ▶ Art therapy
- ▶ Nutritional counseling
- ▶ Wigs/turbans
- ▶ Clinical trial searches
- ▶ Lending library
