## IDENTITY & ACCESS

At Blue Chip, capabilities are the stronghold and foundation of the company, and right at the center is our Identity and Access Solution. Identity and Access consultants have implemented numerous enterprise scale and global management solutions throughout multiple vendor platforms.

Blue Chip's class Solution Architects have built custom solutions to help clients stay competitive in the ever-evolving Enterprise Identity Management market. We give our clients the ability to empower users to manage access through easy integration into existing architectures. Blue Chip helps assimilate authentication policies throughout the organization, while cutting costs, increasing security and boosting end-user productivity.

### Technology Utilized

- *Forefront Identity Manager*
- *Active Directory Domain Services*
