S. Lionel **VINE VOICE TOP 500 REVIEWER**

★★★★☆ **Write speeds a third of read speeds, but still quite fast**

December 21, 2017

Capacity: SD | Color: Gold 128GB | **Verified Purchase**

I'm using this in a Sony A7Riii camera and it works there. I tested its performance using a Sony MRW-S1 SDXC II USB3 card reader and the CrystalMark tool on Windows 10, comparing it to a Sony SDXC II card and a SanDisk SDXC I card.

The Amplim came close enough to the rated 285MB/s read speed - I got 271. But the write speed, for which no claim was made, was a third of that at 91MB/s. This surprised me.

Next up was the Sony card, which claims 300/299 read/write, and it delivered 289/257 - fine. The SanDisk card, which claims 90MB/s read (and no write speed is given) delivered 99/50.

Now, 91MB/s is still pretty darned fast, and it's probably adequate for 4K video and high-resolution photography, but write speeds are what limit you if you are trying to dump a lot of data to the card at once (like if I fill the camera's buffer with 10fps 42MP shots), and I would have preferred it to be faster. I think that if I were going to buy another card, I'd probably pay the (considerable) extra for the Sony. But if you're watching your pennies, the Amplim is just fine.

Arne Odland

★★★★★ **Worked fine with my Panasonic Lumix GH5 firmware v2.1 at max settings**

November 27, 2017

Capacity: SD | Color: Gold 128GB | **Verified Purchase**

This worked for me on my Panasonic Lumix GH5 at 4K 400Mbps All-i 30fps 4:2:2 in firmware v2.1. I recorded through the entire card which took about 40 minutes today Amplim 128GB UHS-II SD Card: Ultra Fast 285MB/S (1900X), U3, Class 10 High Speed Flash Memory Card for 4K, 8K, Full HD, 3D, HDR, 360 Video, 128 GB / 128G TF SDXC Card. New Nov 2017 with zero crashes. On a lesser card from the same manufacturer, the card crashed within 10-15 seconds. I'm not aware of a review anywhere for any other card that has zero crashes with maximum settings. Interestingly, this card was released by Amplim this month. With all of the confusion regarding what cards work with the GH5, I just had to post my experience to try to help.

Mike From Mesa

★★★★☆ **Good read speed but slow write speed. Too slow for UHS-II card**

January 5, 2018

Capacity: SD | Color: Gold 32GB | **Verified Purchase**

I wanted a second UHS-II high speed sdxc card as a backup for my Lexar 32GB UHS-II sdxc card. Normally I would have just bought another Lexar card, but since they are not currently available I bought the Amplim card, based on its speed ratings. Unfortunately those ratings are not very accurate.

When the card arrived I tested it against both my Lexar UHS-II card and another Lexar, this one a UHS-I card. The Amplim card gave a high speed read rating but a very slow speed write rating.

I have attached 3 screen shots. All are speed tests using the BlackMagic speed test app and each is marked with the card being tested. As you can see the Amplim card tested as reasonably quick when reading but almost as slow as my Lexar UHS-I card when writing and since I bought this card to use in the UHS-II slot in my digital camera it is just too slow to use. I will be returning it.

The speed test images are, from left to right, the Lexar UHS-II card, the Lexar UHS-I card and the Amplim card. All were tested using the same computer, the same UHS-II card reader and the same test software.

★★★★★ **THESE ARE AWESOME. Fantastic cards so far**

February 7, 2018

Capacity: SD | Color: Gold 32GB | **Verified Purchase**

THESE ARE AWESOME. Fantastic cards so far. I bought 2 of them and they seem to write very fast and can keep up with the 4K write quality on my Lumix GH4.

Comment | 2 people found this helpful. Was this review helpful to you?   Report abuse

Anthony

★☆☆☆☆ **Womp womp**

February 22, 2018

Capacity: SD | Color: Gold 64GB | **Verified Purchase**

I might return this, because I have a super cheap SanDisk from Walmart and both cards performed the same when transferring multiple 4K videos(Lumix G7 camera) onto my MacBook. It looks beefy for an SD card, so I was really expecting some obvious tells of it being way faster but I did not.

★★★★★ **Good reliable cards, right out the gate!**

December 26, 2017

Capacity: SD | Color: Gold 128GB | **Verified Purchase**

Cards arrived right on time for holiday events. I used them in my new camera and was definitely pleased with the write speed for burst photos.
