What Makes DreamHost So Different?

With nearly 20 years of hosting experience, we focus on successful sites for web designers, developers, bloggers and online businesses. Our community and support helps you create a website fast and easy!

Independently Owned
As we've grown over the last two decades we've remained privately-owned, which allows us to stay true to our values and maintain our commitment to our community of customers.

Passion for Privacy
We believe in everyone's right to privacy, and we back that with a strong anti-spam policy and free WHOIS privacy.

Commitment to Security
Our many security features include Multi Factor Authentication, auto-enabled sFTP and free secure hosting with Let's Encrypt.

Embrace Open Source
We strongly believe in providing open source solutions to our customers whenever possible.

24/7 Support
Our in-house team members do their best to provide one-touch resolution, making you feel like a part of our family.

100% Uptime Guaranteed
We guarantee it so you don't have to worry about it.

Host Your Website with Confidence

We get it. Your website is your dream. We want to be the platform to help it succeed.

Light a fire under your apps!

Run any application on [DreamHost's all-SSD Cloud servers](#). Engineered around OpenStack and Ceph, DreamHost removes lock-in and proprietary chains from your business choice: your applications can grow with us until you're ready to run your own OpenStack. Add [DreamHost Object Storage](#) for your applications for redundant storage, S3-compatible at a great low-price.

What features are you looking for?

- DreamCompute
- DreamObjects

Boot up your next Linux server in less time than it takes to text your mom.

Speed Like No One Else

Our servers are ready for SSH in less than 30 seconds, average. Thanks to smart architecture based on SSD disks, accelerated networks and fast next-gen processors.

Servers That Scale With You

Change any part of your server anytime. Do it automatically with OpenStack-compatible API requests via command line tools and common programming libraries.

Full Root and Full Control

Virtually no limits in the operating system choice or software versions. DreamHost's unmanaged servers can be based on Linux, BSD or even MS Windows. Major Linux distributions are already in pre-loaded, or bring your own.

A Cloud That Grows With You:

If your business needs grow enough for you to justify running your own private cloud, we can help you out. All the code is open source and we publicly disclose our architecture. We will help you migrate your workloads to your own private cloud when the time comes.

Server Pricing That Makes Sense: Flexible and Predictable

Run a DreamHost Cloud server for as long as you need and only get charged up to **600 hours (25 days)** in a given month. All accounts come with 100 GB of block storage and free bandwidth. It's our way of saying thanks! No more confusing invoices, and no surprise at the end of the month. Check out our full list of flavors [here](#).

512MB RAM Server	2GB RAM Server	8GB RAM Server
1 vCPU	1 vCPU	4 vCPU
80 GB SSD Disk	80 GB SSD Disk	80 GB SSD Disk
Free bandwidth*	Free bandwidth*	Free bandwidth*
100 GB Block Storage Included	100 GB Block Storage Included	100 GB Block Storage Included
Max \$4.50/month (\$0.0075/hour)	Max \$12/month (\$0.02/hour)	Max \$48/month (\$0.08/hour)
Ideal for Tinkering	Ideal for Websites	Ideal for Databases
