

U N O R D I N A R Y !

At Clerét, we don't make boring, ordinary looking squeegees!
Too many other companies doing that.

We make squeegees that are downright cool looking, invitingly fun to use,
and work great because that's what consumers have told us they really want!

shower & bath squeegees

So, why do I need a shower squeegee? [\(To View/ BUY Squeegees, Scroll Down\)](#)

Isn't it ironic that when we need a bath we use one of the least sanitary areas in most homes... the shower or bath tub. This area is a haven for mildew and many other undesirable elements, unless it is cleaned after *each* bath. That's because as the water dries it "traps" human skin scales, body oils, hair, soap residue and dirt forming the "infamous," unsightly and unsanitary water spots on glass shower doors, tile, etc.

The quickest and best way to help reduce the accumulation of these materials is to whisk water away with a squeegee *immediately after showering* before the water has a chance to dry. And, believe it or not, this procedure takes just seconds.

We offer two distinctly different yet functionally identical squeegees to meet your needs and design preference. Outlined below are the key differences between the squeegees.

Compare - Contemporary vs. Traditional Style Squeegees

Contemporary

- Dual patented wiping blades for exceptional performance on flat *and* contoured or curved surfaces, i.e. tile, marble.
- Ergonomic design to reduce wrist strain.
- When placed on end for neat storage it actually looks like a piece of art.

Traditional

- Twin wiping edge blade produces extraordinary results on all surfaces.
- The perfect choice for those who prefer a squeegee with a "traditional handle".
