There's no substitute for The Right Technology.℠

Kipu customers rave about The Gold Standard EMR for Addiction Treatment...

"Amazing!"

"Kipu does the heavy lifting"

"Saves Time!"

"ALLOWS US TO DELIVER BETTER CARE"

"Unequaled support."

"This letter is to tell you is how magnificent your software has treated us in this first year!"
"Your software, services and support have made my life bearable and the flexible nature of how we've been able to customize it has allowed us to continue bearing our crosses under unbelievable and unpredicted pressures. If we had not had your software doing all the heavy lifting behind the scenes I can say with certainty that we would not be in the strong position that we are in today, and of this there is a unanimity of agreement with my staff. We just sailed through our State of Illinois DASA inspection and they indicated their respect for your software as they went through our treatment plans and client base."
Hostetler, Above and Beyond Family Recovery Center

Above and Beyond Family Recovery Center

"Saves time, money, and ultimately improves on our staff and client experience!"
"On behalf of the Seaside Treatment Team, I would like to thank you for your professionalism, integrity and for your flexibility in meeting our needs as a new company. Thank you again for aiding us in this endeavor!"
Smothers, Seaside Treatment Center

SEASIDE TREATMENT CENTER

"Our company's EMR."
"After meeting with Kipu first, and then going round and round for weeks and weeks, we finally came full circle and chose Kipu as our company's EMR. We wish we would've heeded our colleagues' advice from the beginning and would've chosen Kipu from the start and saved time and effort."
Gurrera, Florida Addiction and Recovery Center

FLORIDA ADDICTION and RECOVERY CENTER

"Super fast pace for implementation..."
"Just wanted to take a moment of your time to acknowledge an outstanding performance by a member of your team, Meg Enos. I've been working with Meg for almost 2 months now as we are implementing Kipu in 3 of our facilities. We are live at 1, going live Monday at the other and then launching the 3rd by the end of May. This has been and continues to be a super fast pace for implementation and could not have happened without Meg. She has been incredible! She is quick with her responses to questions and her knowledge of the system both on the front end and behind the scenes is unequaled. She has the patience of a saint and is able to keep the project on track even in a room full of cranky clinicians, medical staff, and an IT guy that hasn't slept in days (that's me). Through it all she does this with a smile and the feeling that your concerns are the most important in the world. She is nothing short of excellent!"
Bowles, Granite Recovery Centers

GRANITE RECOVERY CENTERS

"We have found Kipu to be superior..."
"After much research and due dilligence reviewing EMR systems including ZenCharts, Medical Mime, MedEz, etc. We have found Kipu to be superior in user friendliness, technical efficiency, proactivity and more in tune to the special needs in the field of addiction and recovery."
Jacques, Briter Beginnings

"Happy to now be a part of the Kipu team."
"I wanted to let you and your office know that we went to great lengths in choosing a EMR company. Over the last four months we used our due diligence and vetted a number of EMR including Zencharts, BestNotes, and Kipu. We were in last minute negotiations with one of the above mentioned EMR when Kipu after many phone calls and several meetings with Cliff and Jeffrey made a firm commitment to work with us and taking into consideration we are a brand new IOP. I would like to say we are very much looking forward and happy to now be a part of the Kipu team."
Laus, Colonial Park House

KIPU®

What is Kipu?

It's the Electronic Medical Records (EMR) software most widely used by Addiction Treatment Centers. Simply put, it's the Gold Standard EMR. *Easy! Powerful! Fast!*

It's The Right Technology!℠

Why should I choose Kipu over other EMRs?
We've built a better mouse trap. Kipu EMR became the Gold Standard EMR because of its advanced record keeping, extreme ease of use, and agile implementation. With over 1,400 facilities using Kipu EMR today, you know you're using the industry's best and most widely accepted EMR solution. And don't forget that just because we're easy to use, doesn't mean we're not powerful.

How long does it take to implement Kipu?
Thirty days or less. *Guaranteed!* There's a check box on the first page of our simple, two-page agreement for our joint commitment to your 30 Day Implementation. So long as you do not delay, we will have you fully implemented and trained in 30 days or less. If we miss that goal, we'll credit you the FIRST FIVE MONTHS of monthly invoices, up to $5,000.

We're your partner
We're committed to being great partners — we know that your success is our success, and we act that way. That means we will do anything necessary to ensure your successful implementation and use of Kipu. From easy no interest financing, to a simple plain English agreement, to unlimited phone, internet and in-person training and support*. No nickel and dime invoices here! Oh, and partners don't sue each other. That's right, in over 5 years we've never been in litigation with a client, supplier, vendor or employee — we've never even been threatened with such a law suit. We think that says a lot about a company. Sometimes, things go wrong, but we make things right; no matter what!

99.99% Uptime Guarantee
Really! Our product and hosting are bulletproof. If we go down, we'll refund you for down time. We're always on and always available... guaranteed. In fact, in 2017 we were 99.98% available.

Money-Back Guarantee!
If, at any time after you sign our agreement and for 30 days after your go-live training, you're not happy for any reason — no questions asked — simply contact us and we'll refund all but the first $5,000 of your implementation — and any monthly or patient fees will be credited as well.

Simply The Best EMR
Kipu was written in the addiction treatment world and exclusively serves addiction treatment and behavioral health. We start with a full featured pre-admission mini-CRM and run every aspect of the episode of care with medication management, group and individual sessions, Golden Thread and over 80 laboratory interfaces for urine, clinical, hair testing and pharmacogenomics.

Ask for a FREE Business Consultation
Ultimately, what you want to know is how can Kipu help take care of your business so that you can take care of your clients. Right? Well, we're here to help you. Just give us a call today at **(561) 349-5901** for a FREE Business Consultation with a Kipu Expert to demonstrate how Kipu can help your treatment center. You can also request a FREE demonstration online at www.Kipu.Health

**In person as available.*

MORE

A Picture's Worth A Thousand Words.

More than 1,400 addiction facilities have chosen Kipu...Shouldn't you?

Kipu spans every level of care from Detox to Residential Treatment, Day/Night Treatment, IOP, OP, Sober Living and AfterCare, with coverage of every aspect of your business from pre-admission, through treatment and AfterCare. We're interfaced to over 80 labs for clinical, drug, hair testing and Pharmacogenomics.

See for yourself...
As you can see with your own eyes, Kipu was created to be easy to use from day one. Designed to visualize your entire census on one screen (alternatively, there's a list view), you have the ability to identify key details, including patient status, bed assignments, recurring assessments, allergies, urgent issues, admissions and more. Then click on a patient's photo for their complete record.

Fast, Easy, Powerful
Your staff will love using Kipu, but don't let the speed and ease of use fool you. We're packed with power under the hood. Simplify every aspect of client care with thoughtful, built-in efficiencies, such as one-click file creation, seamless integration between group and patient management, fully customizable bed-boards and integrated insurance documentation and Utilization Review (UR).

The Gold Standard EMR for Addiction and Behavioral Health Treatment.
At Kipu we are 100% focused on developing cost effective and easy to use Electronic Medical Record (EMR) technologies for the addiction and behavioral health treatment community. Our field-tested, cloud-based system; Kipu EMR, is designed to provide paperless solutions for the entire client lifecycle – from the first phone call through discharge, and beyond. Best of all, our system is so intuitive and easy to use, the typical deployment time-frame is just one month.

Truly Customized EMR
Kipu EMR works off the shelf for new facilities with our extensive forms library, and is also 100% fully customizable, and designed to adapt to your facility's existing workflow. Our fast, agile implementation will convert your work process forms and treatment plans, progress notes, homework, etc. into a complete, fast and easy to use system. Our Implementation Specialists see to it that the system is configured to your needs from day one. This helps your facility get up and running, without the lag time it typically takes to learn a new system.

FREE* VOB*Getter*
Daily, On-Demand, Instant Verification of Benefit Availability and Daily Benefit Monitoring. VOBGetter delivers automatic daily monitoring of your entire active census for instant notification of lapse of insurance for all active patients in Kipu EMR. We poll multiple databases and many payors directly for coverage availability, so you have the information you'll need to make decisions quickly and accurately.

30-Day Agile Implementation
Our simple, two-page agreement includes our joint commitment to your 30-day implementation. Or sooner! That includes fully training your staff and getting you up and running. We guarantee it!

The Patient Tab shows your current census, and provides access to all patients' charts by simply clicking or tapping on a thumbnail.

From the Patient tab, you will be able to see:

> Patient's picture
> Patient's name
> MR/Chart Number
> Bed Assignment
> Program/Track (thumbnail color)
> UR Indicator for authorized users
> Recurring Assessments indicator for authorized users

r- = no active recurring assessments

r+ = active recurring assessments

- Drug Allergy
- Food Allergy
- Environmental Allergy
- Special Dietary Need
- Unreviewed Lab Result
- Urgent Issue
- Pending Admission
- Discharge Today
- Insurance Lapse*

All patient thumbnails may be color-coded to reflect your organization's preferences, Program Tracks, and more.

New! Golden Thread
Kipu EMR links all aspects of the treatment process including the treatment plan through its "GOLDEN THREAD." Whether your treatment plan is medical, clinical or spiritual, the Golden Thread allows you to manage the entire episode of care efficiently and quickly. Insurance payors and accreditation agencies are increasingly requiring a "Golden Thread" connecting the components of patient care to help document "evidenced based treatment" and process payment. You can define your own problem areas or select from a predefined list to identify a complete problem list. With this as a starting point, you can build truly custom treatment plans with your own content, or use the preloaded library of more than 2,500 goals, objectives and interventions.

Once the custom Treatment Plan is created, it allows for ongoing documentation of the progress, including Patient signature to acknowledge the status of each objective.

SECURE in our Private Cloud
Kipu EMR was designed with built-in redundancies such as full data encryption, multi-factor authentication, and role-based logins to help you keep your patient data secure. No servers, I.T. investments, or other expensive I.T. infrastructure. Just log into our HIPAA-compliant environment from any PC, laptop, tablet or smartphone. We handle backups, redundancy, upgrades, security and administration for you. In addition, Kipu has consulted with experts from the Joint Commission and CARF to develop a library of fully compliant patient documentation for use by substance abuse and behavioral health facilities. Learn more about how Kipu can help maintain compliance at www.KipuEMR.com

Customizable Lab Interface
Kipu has partnered with over 80 testing labs in order to process orders and results electronically, enabling substance abuse facilities to order, collect and receive lab results all within the same seamless interface. Kipu's powerful lab interfaces allow your medical personnel to place orders for testing, process requisitions, and receive lab results directly into the patient chart, saving you countless hours and effort spent faxing, reviewing, and scanning paper reports (remember, emailing reports is a HIPAA violation).

KIPUMessenger

New! KipuMessenger: Messaging & Telehealth
From Kipu (live), you can now send assessments, consents, evaluations, questionnaires, surveys and forms to clients or potential clients to fill out and return as LIVE DATA in Kipu. A secure telehealth platform that allows you to communicate with patients and between staff, including one-on-one therapy sessions.

KipuMessenger is a six year old telehealth app that runs on Apple and Android smartphones, allowing you to communicate securely with patients, among staff and via video. KipuMessenger can improve Kipu, improve patient care and streamline your agency. The HIPAA Compliant Communication Solution.

Sending a text message or email containing PHI (Protected Health Information) is just plain illegal under HIPAA. So are unsecure telehealth calls using unencrypted video. KipuMessenger brings you into HIPAA compliance.
