Save Time

- Boost Productivity
- Consolidate Shipments
- Increase Profitability
- It even makes Coffee *

* Our software doesn't actually make coffee. But, if it could, it would efficiently consolidate brews.

EFFICIENCY, COST SAVINGS,
AND VISIBILITY

Pangea offers an improved, streamlined shipment execution workflow by integrating with your hardware, including digital scales, dimensioners, and printers. The result? Dramatically increased efficiency. Pangea also integrates on the sales order or fulfillment level, allowing customers to easily consolidate multiple orders headed for the same destination, reduces data entry, and eliminates the need to manually enter invoice details for a shipment.

Pangea also saves you money by providing full visibility of all your options, and helping you choose the proper carrier. The platform displays all applicable rates, all customer parcel carriers, LTL (less-than-truckload) carriers, and cartage carriers. Pangea creates additional savings by consolidating your shipments and reducing the time your team spends on checking rates and creating documents.

PLUG INTO A POWER SHIPMENT API SET

All of Prologue's software platforms, including Pangea, are designed to integrate with your existing ERP. Access to the API allows you to gain the increased efficiency and cost-saving benefits of Pangea, while still using technology your team relies on.

READY TO SEE IT IN ACTION?

Ready to see Pangea in action? Sign up for a demo today, and we'll show you how you can increase efficiency, save money, and spend more time focused on your bottom line, and less time managing your shipments.
